PART 1: EXECUTIVE SUMMARY

PROJECT TITLE		A project feasibility study on establishing a "Barbershops ship" in Zamboanga City.
Project Location		West Coast of Zamboanga City
Project Proponent		AHMAD A. ALAWADDIN Suterville, Zamboanga City Philippines
Project Ownership		Sole Proprietorship
Project Description		The proposed project study deals The proposed project "Establishing Pepsi Cola Distributorship"" will engage in the business selling and distributing Pepsi products to retailers and consumers in West Coast Communities and nearby areas.
Project Funding		100% Personal Funds
Project Benefits		The project provides soft drinks in cases to the store/ restaurant owners. It will provide employment Opportunities and income for individuals who will be employed generating income tax. Likewise, assures abundant and steady supply in the market.
Project Objectives		To be able to establish, operate and raise a profitable Barbershops ship to the target market.

Return On Investment		81.36%
Payback Period		1.5 Years
Net Present Value		1,061,649.96

PART 2: INTRODUCTION

2.1 Background of the Study

In the modern culture, barbershop particularly among younger generation has become very popular. Salons in various styles are widely patronized by people at various occasion like dinner parties, marriages, social get together , birthday celebrations etc. all children of all ages and groups especially attracted by the mere mention of the word barbershop. With the growing popularity barbershop, the technology of its production, preservation, transportation and or marketing in recent years has witness phenomenal changes.

People from different lifestyles have always considered salons as highly saleable items.

The salon industry is a fiercely competitive one, with the number of choices available to consumers increasing every year. innovated by the proponent. Haircut is a contractual business undertaking between the owner and the barbers which is assigned on area convenient for all. The arrangement is on a commission basis yet sophisticated enough with lots of incentives and benefits for the owner, the barber and the customers. It is a unique business arrangement with much potential for those who are willing to take part. Being a barbers it offers many business opportunities :

- The benefit of profit to the owner and the barber
- The benefit of earning incremental income thru the incentive program;
- The benefit of bicycle to the barb
- The benefit of marketing budget allocation to win more outlets

which will surely help the operator's distributi0n expansion, such as concessions for exclusivity

the population of Zamboanga City particularly in the west coast is increasing annually and the demand for haircut also increases and at present there is a need of a barbershop.

2.2 Statement of the Problem

This is a feasibility study on the proposed project of a " Barbershop in a Bike"

What degree of influence in the following five (5) functional aspects of the " Barbershops ship", Zamboanga City.

Specifically, it seeks to address operations relative to the following aspects of the proposed project study:

Marketing Aspect- Generally the proponent is attracted to invest in a business project knowing the minimal risk and it is believed that a higher rate of return on investment. The major consideration is whether there is an ample demand for the business being proposed. Marketing aspect will also help determine whether there is a substantial excess demand, so that this activity could enter into the industry. If at the beginning, it is discovered that there is not enough demand for the product nor a new demand can be created, then the project must be abandoned immediately before substantial losses will be incurred. Conclusion will be drawn from the study. These specifically identify whether there is adequate demand for the product and that the project shall enjoy competitive marketing position.

Organization and Management - This is to determine the appropriate organization, the people who will be involved both before and during the operating periods of the enterprise, and then functions. This will answer how the project should be manage before and during the operating periods, pointing out the firms or persons involved or to be involved in studying the different aspects of the project, types of business organization, organizational chart and functions of each people involved in the project.

Technical Aspect - This aspect will help identify that product could be produced at the highest possible quality with minimum cost. The composition of the product specifically relating to physical, mechanical and chemical properties is described. This also includes the uses of the product. Another relevant information is the equipment that will be used for the operation of the project. Location of the process will be considered in this project. It is determined that the location is desirable in terms of distance to sources of the product and to the customers. Utility and waste disposal will be taken into account here indicating specific utilities like electricity , fuel, water, supplies and their respective uses, quantity required, balances, availability of sources, alternative sources and costs.

Financial Aspect- this aspect determines the profitability level of the project which is generally defined as the relationship of the net income after taxes to the total investment. It is largely based on the available opportunity cost in a particular period of time, and place. The financial study also involves a thorough coverage of all the monetary information of the enterprise. It covers detailed information on. The total project cost, initial capital requirements sources of financing, financial statement and the financial analysis. Included are the following:

- Project Cost
- Return of Investment
- Net Present Value
- Other important financial ratios

Socio –Economic Impact- The project is classified as sole proprietorship and is private. Being profitable is the main priority of the business. But socio economic desirability is measured in terms of the number of workers that the project will employ and the approximate annual amount of taxes to be paid by the project . it is also measure by the economic benefits that will accrue to the people living in the community and its vicinities.

2.3 Objectives of the Study

2.3.1 General Objective

Towards the establishment of the proposed project of “ Barber in a bike” in the Zamboanga City.” It will be conductnd concentrated on determining the viability of the following aspects vital to the successful operation of the proposed project.

2.3.2 Specific Objectives

a. Marketing Aspect

b. Organization and Management Aspect

c. Technical Aspect

d. Financial Aspect

e. Socio- economic Aspect

2.4 Significance of Study

This study will serve as useful reference and beneficial to:

The proponents. This study will help decide the proponents to undertake and implement the activity if found feasible. Wise decision making will be observed on the part of the proponents.

The clients. This study will enable to serve the community of the west coast. This will also give them idea of the latest service is offering them.

The Future researchers. This will serve as future reference for all students undertaking activities relative to the proposed business study.

2.5 Scope and limitations

This feasibility study will confine itself in the determination, analysis and evaluation of the feasibility and viability of establishing of Barbershops in the west coast.

Integrated into this project study are the important aspects on market, organization and management technical, financial, and socio –economic impact. Concerning the financial aspect the five year projection will be drawn to serve as a guide in the future outlook of the proposed project.

2.6 Methodology

In this feasibility study, the proponent will utilize several methods and approaches to make a comprehensive and substantial preparation for consideration. For data gathering various medium will be used like carrying out and conducting personal survey of the community and barangays of the west coast. Personal interviews will also be conducted among the various retailers and the residents for the concerned area. Data gathering instruments like the questionnaires and interview questions will be prepared by the proponent.

The proponent will also visit the concerned government offices like the national Statistics Coordinating Board, Department of Trade and Industry, Office of the City Mayor/Business Permit Office, and the Local Barangay Councils.

PART 3. MARKET ASPECT

3.1 Brief Market Introduction

Marketing is an orderly and insightful process for thinking about and planning for markets. It is considered the most important aspect of the feasibility study that needs to be given outmost priority and careful attention. The process starts with researching the market place to understand its dynamics. The marketer tries to identify opportunities – that is to find individuals or groups of people and most specially the store owners who will be the direct customers with unmet needs or a latent interest in a particular product or service.

Marketing is a social and managerial process by which individuals and groups obtain what they need and want through creating , offering and exchanging products of value with others. Marketing starts with human needs and wants. People need food, air, water, clothing and shelter to survive. Beyond this, people have strong preferences for particular versions and brands of basic goods and services. Hence, Marketers influence demand by making the product appropriate, attractive, affordable and easily available to target consumers. Marketing is the most vital aspect of feasibility study thus it needs the utmost concern from the proponent. In this study, it will concentrate on the product description, target market, demand and supply situation and the marketing strategies which cover promotion, pricing and placement of the product. These are what the proponent would like to achieve for this project.

The marketing process involves segmenting that market and choosing the target markets that the business entity can satisfy in a superior way. It must formulate a broad strategy and determine a specific marketing mix and action plan to optimize its long-run performance. It defines a set of controls to evaluate operating results and continue to exist as a learning enterprise constantly improving its marketing know-how.

As an aspiring entrepreneur , the proponent had an idea of coming up with the business as he has seen the potential of the business in the market. The proponent is formerly connected with most barbershops in Zamboanga City and has seen how profitable a pe rson can be once he is engaging in this type of business. Having this in mind, the proponent had a chance to talk with the business owners about business which he could make. However, an idea for a business is not a sufficient reason to begin straight away, without having thought clearly about the marketing aspects involved.

Many questions have been considered such as “ Is there a demand for the business, are there competitors in the market? The market aspect should be looked at in turn. In order to analyze the demand of the product in the market, all information needed were gathered such as the total population of 11 barangays chosen by the proponent for the operation of the business, total population of business establishment that sells soft drinks in 11 chosen Barangays were also determine. The market share of Barbershops and its competitor. Information of the market share were gathered through focused group discussion undertaken between the proponent and the personnel . Other sources were provided by the Internet and the Social where an interactions of people from different walks of life happened. A survey were distributed to the consumers to know their preferences of Haircut services. To substantiate more the data, the proponent had an interview with the NSO for the total population of the Zamboanga City , particularly the barangays chosen. A data from the licensing office were gathered to know how many business establishments are registered in the chosen barangays. From the said information, a demand was determined for the business. .

3.2 Product Description

Competitive Strengths

3.3 Marketing Environment

The population of Zamboanga City is increasing from time to time. For the year 2000, the city's population was 601, 794. In 2007 it has reached to 774, 4007 with an increased of 28.7% . to this date, Zamboanga City Total Population is 946, 613, which has an increase of 22.2%. while the growing number of people is increasing the demand for haircut is also increasing that the stores cannot meet.

3.3 Target Market or consumers

Integrated into this aspect of this target market or consumers are the primary market and secondary market

For the primary market, this study will include the areas where the density of population are concentrated in terms of number of households, business establishments, offices, schools, Mosques ,churches and other non-government agencies and entertainment areas

For the secondary market, the underlying areas outside the perimeter of the primary market , the residential areas with more populous inhabitants will be the source of secondary customers.

3.4 Demand

Table 1. Population of Eleven (11) Chosen Barangays for the year 2010

Barangay	Population (2010)
Baliwasan	27,664
Campo Islam	11,523
San Jose Gusu	24,917
San Roque	20,974
Upper Calarian,	25,655
Malagutay	5,624
Sinunuc	15,926
Cawit	9,305
Maasin	6,095
Recodo	17,754
Ayala	16,929

	182,366	**188566.4**	**194977.7**	**201606.9**	**208461.6**

Table 3. 60 % of the Total Population of the 12 Barangays who drink soft drink

	2010	2011	2012	2013	2014
Demand	109,420	113,140	116,987	120,964	125,077
In Cases	4559	4714	4874	5040	5212

Table three (3) shows that of the total populace of the chosen barangays 60 percent (%) are drinking soft drinks almost everyday. Initially we can conclude that 109,420 people are drinking soft drinks which is equivalent to 4,559 cases a day . This analysis was made through the interviews conducted by the proponent with the end users. Out of the total population, the respondent came up with 100 questionnaires for the end users and it shows that out of the total respondents, 95 percent answered that they are drinking soft drinks. Thinking that in every barangay, there are children who are not drinking softdrink, the proponent made an assumption that the demand will based on 60 % total Population of those who are drinking soft drinks of the west coast. Although the store retailers are the primary market of the business. It should take into consideration the total population of the people in order to know the demand that every store of the chosen barangays should cater . In the year 2010 the demand is 4559 cases a day which is equivalent to 109,420 bottles a day . It means that every day there are people who drink and buy soft drinks. This means that the business should be able to supply this needs.

In order to determine the demand and supply of the chosen barangays , the proponent decided to come up with survey questionnaires intended for the consumers, store owners and distributors of pepsi. 100 survey questionnaires were prepared to consumers and store owners. While an interview with the existing EDS operator(Distributor) were undertaken. To substantiate the study, the proponent initiated a Focused Group Discussion for the Managers of Pepsi Cola Product Phillippines. The table below were the results of prepared survey.

Survey Questionnaires : Store Owners

Computation 1: Number of Stores which are exclusive Coke, Pepsi and non-exclusive,

Responses	Number Of Stores	Percent
Exclusive Coke	60	50%
Exclusive Pepsi	20	17%
Non-Exclusive	30	25%
Do not sell either coke and pepsi	10	8%
TOTAL	**120**	**100%**

Table 2.1 shows that among the 120 Stores surveyed , 60 Stores are exclusive Coke, 20 exclusive pepsi, 30 stores are non exclusive and the remaining 10 do not sell either coke or pepsi.

Computation 2 : Number of Cases of softdrinks sold in a day

Amount	Number of stores
1-5 cases	**80**
6-10 cases	20
11 – 15 cases	7
16-20 cases	3
More than 20 cases	0
TOTAL	**110**

Computation 3: Years of Exclusivity

Number of Years	Number of Members	
1 year	57	48%
2 years	18	15%
3 years and more	5	4%
Non Exclusive	20	16%
TOTAL		

Interview with the Barbershops

There are 30 EDS operators that operate in the Zamboanga assigned in specific barangays. However their presence in different barangays in Zamboanga City are not enough to supply the needs of different stores particularly those stores located in remote areas which are hard to penetrate by both coke and pepsi sales representatives. These EDS operators are not to be considered by the business. The direct competitor of the business will be Coca Cola Products Philippines.

During the conduct of interview among the EDS operators (Distributors) the proponent had an interview with them one by one and asked them the same questions. Here are the questions ant consolidated answer by the proponent and the EDS: It was known from the EDS operators that they have an average sales of 170 cases per day for carbonated drinks. That include Pepsi , Mirinda, 7 up, Mountain dew and other carbonated drinks. The most sellable is Pepsi 8 oz which has an average sales of 70 cases a day and followed by mountain dew with 65 cases . the remaining cases are being shared by other products of pepsi.

Sting , an energy drinks has an average sales of 80 cases a day. while the rest of the products that falls under non- carbonated drinks are not included here since the main purpose of the proponent is to sell those products which are known to be sellable in the market.

The price lists of the products were also provided by the operator and the corresponding commission per case was also provided. Pepsi 8 oz earns 17.40 per case, but the rest of the product can be given equal commission just like pepsi. Sting has a commission of 20 per case

Aside from regular sales, there are special occasions you that EDS operators are engaging for additional income such as Fiesta, wedding , Christmas, hariraya and new year. And in every special occasion , an average sales of 20 cases per occasion is calculated.

Table 4. Total Number of Stores Selling Soft drinks in 11 Barangays

Barangay	**Population(2010)**
Baliwasan	192
Campo Islam	23
San Jose Gusu	121
San Roque	133
Upper Calarian,	61
Malagutay	6
Sinunuc	35
Cawit	20
Maasin	22
Recodo	56
Ayala	90
Suterville	39
Total number of Stores	**794**

Source: City Licensing Office

Out of these stores , 135 are shares of pepsi while, 397 belongs to the market of Coca Coal. 262 stores are still not penetrated by both soft drink companies and are potential customers of the business. During the conduct of interview by the proponents, these stores buy pepsi every other day with an average of 4 cases per transaction.

3.2 Demand Situation

Table 5: Past Demand (2005-2009)

Year	Daily	Monthly	Annual
2005	2,787	72,462.00	869,544.00
2006	2,973	77,292.80	927,513.60
2007	3,159	82,123.60	985,483.20
2008	3,344	86,954.40	1,043,452.80
2009	3,530	91,785.20	1,101,422.40

Table 6 : Projected Demand (2010-2014)

Year	Daily	Monthly	Annual
2010	3,716	96,616.00	1,159,392.00
2011	3,902	101,446.80	1,217,361.60
2012	4,088	106,277.60	1,275,331.20
2013	4,273	111,108.40	1,333,300.80
2014	4,459	115,939.20	1,391,270.40

3.3 Supply Situation
Table 7: Past Supply (2005-2009)

Year	Past Supply (In Cases)
2005	1542
2006	1644.8
2007	1747.6
2008	1850.4
2009	1953.2

Source: Pepsi Cola Products Philippines Plant and, Distributors

Table 8 : Projected Supply (2010-2014)

Year	Projected Supply(In Cases)*
2010	2,060
2011	2,164
2012	2,268
2013	2,372
2014	2,476

*Forecasting Method Used: Trend Projection

Linear Equation: (Trend Line Equation)

$\hat{Y} = a+bX$

Where Y= Computed value of sales to be predicted (y axis intercept)

$a = \hat{y} - bx$

$b = \frac{\Sigma X Y - n X \hat{Y}}{\Sigma X^2 - n (x)^2}$ (Slope of the line)

x = Independent Variable (Time)

Computation 4:

Year	Time (X)	Supply (Y)	X²	XY
2005	1	1542	1	1,542
2006	2	1644.8	4	3289.6
2007	3	1747.6	9	5242.8
2008	4	1850.4	16	7401.6
2009	5	1953.2	25	9766
	Σx=15	**Σy=8,738**	**Σx²=55**	**Σxy= 27,242**

Solve for:

$$b = \frac{\Sigma xy - nx\hat{y}}{\Sigma x^2 - n(x)^2}$$

Where : $x = \Sigma x/n = 15/5 = 3$

$\hat{y} = \Sigma y/n =$ **8,738**/5

$$\boxed{\hat{y} = 1{,}748}$$

$$b = \frac{\mathbf{27{,}242} - 5\,(3)\,(1{,}748)}{55 - (5)\,(3)}$$

$$= \frac{\mathbf{27{,}242} - 26{,}220}{55 - 45}$$

$$= \frac{1{,}040}{10}$$

$\boxed{b = 104}$

$a = y - bx$

$= 1{,}748 - 104\ (3)$

$= \mathbf{1{,}748} - 312$

$\boxed{\mathbf{a = 1{,}436}}$

Linear Equation : y = a + bx= 1,436 + 104 (x)

Computation

Year	**Linear Equation**	**Projected Supply**
2010 X= 6	Y =**1,436 + 104** (6)	2,060
2011 X= 7	Y = **1,436 + 104** (7)	2,164
2012 X = 8	Y = **1,436 + 104** (8)	2,268
2013 X = 9	Y = **1,436 + 104** (9)	2,372
2014 X = 10	Y = **1,436 + 104** (10)	2,476

3.4 Demand - Supply Gap Analysis

Table 9 : Demand and Supply Gap (2010-2014)

Year	**Demand (in cases.)**	**Supply (in Cases.)**	**Demand and Supply Gap**	**Market Share**
2010	3,716	2,060	1,656	45%
2011	3,902	2,164	1738	45%
2012	4,088	2,268	1820	45%
2013	4,273	2,372	1901	45%
2014	4,459	2,476	1983	45%

Demand and Supply Gap

The prospective demand for the product is not met by the limited supply. Though the projected daily demand is 1,656 cases, the proponent is only willing to supply 197 cases assorted soft drinks of pepsi. However , the discrepancy between the projected daily demand and projected daily supply gives more than enough assurance that the possibility for good business is high.

Based from the data shown there is still 45 percent of the total populace who are not serve by the store owners. Possible reason is that there are people specially from different corners of the barangay are not yet serve by both coke and pepsi.

3.5 Marketing Strategies

3.5.1 Pricing

The proponent intends to adopt the lowest pricing scheme provided by the Pepsi Cola Products Philippines in the region. Since the business is on commission basis , it doesn't need to lower down the prices since it is affordable.

Table 11 : Price Competitiveness

	80z	**12oz**	**1 liter**	**330 ml**	**500 ml**	**1.5 ml**
Pepsi	144	192	236	420	420	420
Mountain Dew	144	192	236	420	420	420
7- up	144	192	236	420	420	420
Mirinda	144	192	236	420	420	420
	240ml	**330ml**				
Sting	200	360				

3.5.2 Placement of Distribution

The business will be undertaken in the west coast particularly in Baliwasan, Campo Islam, San Jose Gusu, San Roque, Upper Calarian, Malagutay , Sinunuc, Cawit, Maasin , Recodo, and Ayala.

3.5.3 Promotion

Considering the high demand of pepsi products , the proposed EDS and the target markets, promotion efforts will be minimal. As Exclusive seller of Pepsi stores will be given Entitlement to pepsi - cola merchandising collaterals such as powered coolers,ice co0lers,posters,etc. There will be benefit of marketing budget allocation such as concessions for exclusivity.

PART 4. TECHNICAL ASPECT

4.1 Brief Introduction

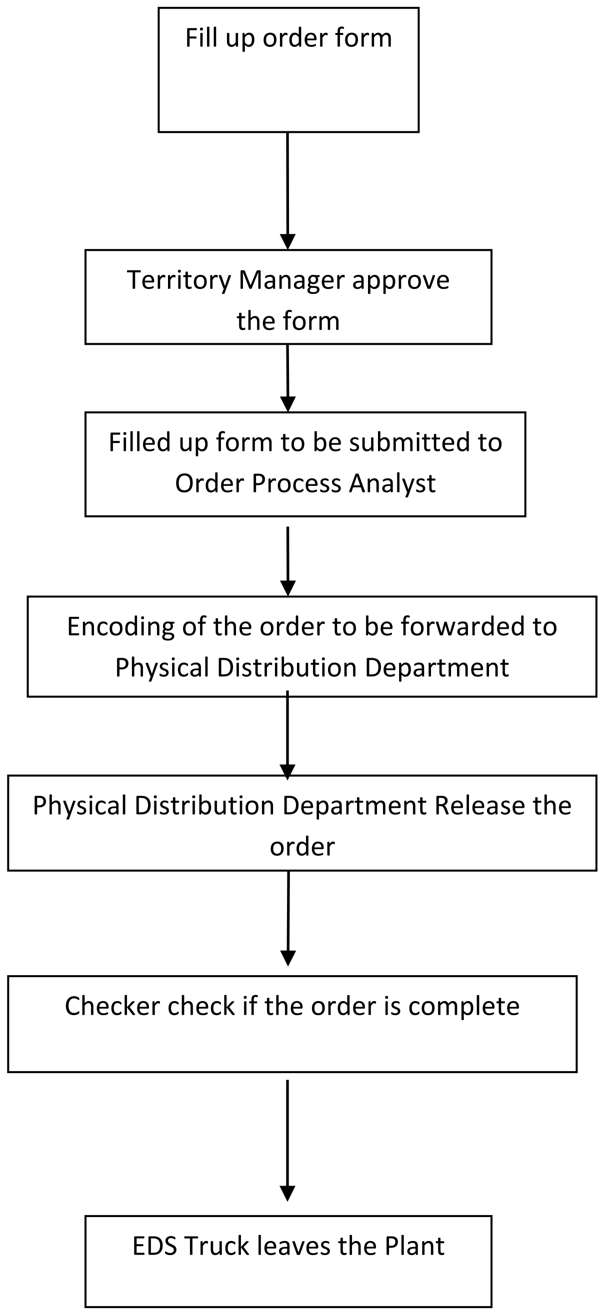
The Barbershops ship shall engage in Entrepreneurial Distribution System that would be involved in the selling of Pepsi products . This activity will cater to the needs of more storeowners in Zamboanga City particularly in the west coast. There are many products that need to be sold. the table below show the list of product that the proponent will be selling:

The proposed project does not need building. The transactions to be undertaken will be at the office of the Pepsi plant. Tables, chairs and other materials needed will also be provided. However the proponent will have a small office at his own home for additional transactions. The office at home will not be rented and office supplies and furniture and equipments will be purchased for the transactions of events that will take place.

4.2 The operation

The Pepsi cola products Philippines shall be responsible for the supply of softdrinks both CSD and Non-CSD . The proponent shall purchase 1 truck , 2 carts for the distribution of the products.

Figure 1: Pepsi EDS Distribution Procedures:



Before the distributor can get soft drinks from the company, he must fill up the order form and have it signed by the territory manager of the company for the approval .

After the approval the helper will proceed to the order processing analyst for assistance and for encoding.

The encoded order will be sent to the Physical Distribution department

The physical distribution receives the order and items will be released

A traffic clerk will check if the items released are correct.

The truck will be ready to depart.

4.3 Project Location

The business will be routing in the west coast of Zamboanga City. It will cover the following barangays: Baliwasan , Campo Islam, San Jose Gusu, San Roque, Upper Calarian, Malagutay, Sinunuc, Cawit, Maasin, Recodo and Ayala

Its office will be the Pepsi Plant located in Culianan. However , the proponent will have his own office at his very own home . There will be no charge of the office inside the house since it is a property of the proponent.

4.4 Payment process

The distributors of Pepsi can bring the products without payments. Right after the transactions the distributor returns to the plant at 4 PM. And will remit all his sales and inventory to the company.

A form will be filled up

The helper will indicate how many cases which were sold

The Territory Manager will sign the form

The helper will submit the authenticated form to the RSA for the payment of the cases sold. The distributor gets his share of 17.40 per case as his commission.

4.5 Operation schedule

Being an EDS operator, 6 working days is required for the selling of the products. There will be 317 working days in a year. However Sundays can be utilized in order the distributors can meet his quota.

PART 5 : ORGANIZATION AND MANAGEMENT ASPECT

5.1 Brief Introduction

Organization is a group of people working together to attain certain goals. These organization which are distinguished form mere collections of people by having relatively specific goals and by having a rather well formalize structure ,arise when people join together, assume and coordinate duties and responsibilities for some purpose. (C. Bernard, the functions of Chief Executive.)

Business organization is to enhance economic well being, people function in goal seeking a system when the work of organizations is divided among people and then that divided work is coordinated to achieve organizational goals.

Organization requires resources and uses them , hopefully in efficient way, to produce an output of goods and services. It means that the activities and processes used by the members of the organization to do these things.

5.2 Form of ownership

The “ Barbershops ship” will exist as a sole proprietorship in the business area. There would be 5 workers. Among these workers, One (1) will be the one who will manage the business , one (1) will be drivers and three (3) helpers for the truck that will carry Pepsi main products such as , Pepsi, Mirinda , 7 up and Mountain Dew.

5.2 Description of Organization

The proponent opted to organize the proposed project as sole proprietorship that receives all the profits and assumes all the risk of ownership. Being the simplest form of ownership enjoys among others, the following recognized advantages:

A.) It is the easiest to form and organize for no form requirements are required by law, except when the owner shall do businesses under trade name or style in which case, it is necessary.

B.) To register such name to the Department of Trade and Industry (Act. No. 3883 as amended by act no. 4147 and Republic Act 863).

C.) To pay a fee in the sum of One hundred forty eight pesos plus documentary stamp of fifteen pesos the for use of such trade name for five years (Section 2 Act No. 3883) renewable every five years for similar fee.

D.) It has the quality of simplicity and flexibility in the management and control.

E.) It is possible for the proponent to engage any time in other business even those unrelated to his main business.

F.) The proponent may discontinue his business activity and venture another at his will and discretion.

Thus, the manager is the proponent of this project. The proponent will hire one(1) driver and three (3) helpers for the operation of the project.

5.3 Project Phasing and Timetable

It is estimated that there will be three months preparation prior to operation of the proposed project. Below are the pre-operating activities involved and its timetable.

Figure 3 : Pre-operating Activities

Month	1st Month				2nd Month				3rd Month

5.4 Recruitment Policies

All interested applicants are welcome, they must be physically fit, work attitude and competence are highly commendable. The selection process of applicants as follows:

A.) All aspirants are treated equally; those who did not meet the minimum requirements shall be informed immediately.

B.) Actual training to those qualified applicants, duties and responsibilities shall be introduced.

5.5 General Working Policies/Employees Compensation/ Benefits

The terms and conditions of the contractual term employment with the business as follows:

The business operations will be at 8:00 A.M. to 4:00 P.M. from Monday thru Saturday.

5.5.1Employment Benefits- employees are assured of being paid the salary rates as agreed upon, plus the following employee benefits:

1. Service Incentive Leave of five days after One (1) year of service
2. 13th month pay
3. SSS/Pag-IBIG membership & Philhealth coverage

5.5.2 Timesheet submission-the proponent requires timesheet submission every end of the month. Failure to submit timesheet promptly could cause disruption of the accounting procedures and would mean considerable delay in the release of employees' salary.

5.5.3 Salary- Employees salary shall be paid in cold cash.

5.5.4 Leave Benefits- One of the conditions of your employment with the business is the application of the "no work, no pay policy". However, after rendering one (1) year service with Barbershops ship, employees are entitled to a five (5)-day service Incentive Leave benefit for each year of service, to start one (1) year from the date of your initial appointment. Leave application must be filed in three (3) days before the date of vacation leave while sick leave application will be filed on the day of duty`s resumption.

5.5.5 Service Incentive Leave (SIL) Policies:

1. SIL credits are commutable to cash on the anniversary date of your appointment.
2. SIL shall be forfeited if you are terminated for cause.

3. Should you resign, the proponent shall pay the money equivalent of your SIL credits except when your service is less than one (1) year.

5.5.7 Absences/Tardiness-Any employee who plans to be absent or late for work must call, text or notify his immediate superior at the earliest possible time. Habitual absences or tardiness without any valid reason is a ground for termination of employment with the Ginger Farm. Likewise, any unexcused one (1) day absence shall mean Absence Without Leave (AWOL) which can eventually lead to the termination of the employee.

5.5.8 Rules and Regulations-During the period of employment, the prospect employees shall strictly abide with the existing policies, rules and regulations where employees are assigned, such as, but not limited to:

1. Courtesy of superiors, employees and clients/customers must be observed.
2. Always record your time in and time out in Daily Time Record (DTR) card.
3. Observe Policies, Rules and Regulations in rendering overtime (after 5 years as contractual workers). Accomplish the required overtime form before rendering OT. Log in and out at all times.
4. Notify your superior in case you are sick and could not report for work for appropriate recording and disposition. Leave applications must be accomplished and filed.

5.5.9 Causes for Recall or End of Employment/Termination- Prospect employees should also understand and agree that your employment with Barbershops ship shall be considered ended/terminated or prospect employees may be the subject of a recall under any of the following conditions:

1. Your voluntary resignation. You are required to submit a letter of resignation at least fifteen (5) days prior to the effectivity of your resignation. Failure to

comply with the five-day notification would mean the withholding of any monetary benefit due you.

2. Commission of acts endangering the interest and security the business, such as drug abuse, dishonesty, theft or any form of deception or fraud.

3. Conduct and behavior that maligns the image of the business , or inimical to the morale and harmonious relationship of the employees of the business , unbecoming behavior, insubordination, improper acts such as drunkenness, gambling, excessive borrowing of money or failure to pay debts, gossiping and revealing confidential information or documents, indiscriminate and official use of farm equipment and facilities

PART 5: FINANCIAL ASPECT

5.1 Brief Introduction

This chapter refers to finding business opportunity and conducting investigation to determine whether is should be undertaken or in other words, it refers to look for business prospects and make a study as to whether it would be worthwhile going into.

The Financial aspects include the determination of the financing requirements, sources of financing, the cost of capital and it covers also the presentation of the expected result of operations, their effects on the financial resources of the company and analysis regarding with profitability, liquidity and stability.

The proposed Barbershops , financial management will primarily concerned with two functions. The first function, acquiring funds to meet the Sole Proprietorship`s current and future needs. The second function is to monitor and control the financial results of a Sole Proprietorship`s operations.

The activities of proposed Barbershops , Financial Management can be grouped into four categories:

a.) Determining the magnitude and characteristics of funds necessary to conduct the proposed business operations.

b.) Allocating resources in most efficient manner.

c.) Serving as an interface with the owner and prospective creditors concerning the financial condition of the proposed Barbershops .

d.) Providing financial data to top management in determining the feasibility of various strategic alternatives.

6.2 Notes and Assumptions

1. The project needs of P 386,881.00 as initial Capital Investment.
2. Financial Projection is spread over five (5) years to determine the payback period.
3. The target daily sales of 197 cases and increased by 10% every year of units of sales volume.
4. Commission income earn are based on number of cases sold by the distributor amounted to 17.40 and 20.00.
5. Sales will be made on cash basis only.
6. Provision for Salaries of wages of all personnel increase by 5% annually.
7. Annual Business Permit & License P2, 500.00 is to be increased by P 500.00 and renewed every year.
8. Supplies of P 5,881.00 is to be increased by 5% annually.
9. Depreciation is computed using straight line method. Items costing P 2,500.00 and above will be depreciated and all items below this amount will be expensed.
11. Furniture and Fixtures, Equipment and Transportation is worth of 326,000.00
12. Repair and Maintenance is estimated at P 10,000.00 and will be increased and P 1,000.00 annually.
13. Diesel and Fuel is estimated at 800.00 monthly and will be increased by 5% annually. Diesel and fuel expense will be shouldered by Pepsi.
15. Inaugural expense is estimated at P 10,000.00
16. Income tax is based on the latest BIR standard rates

Schedule 1: Investment Requirement

Decision Parameters

C. Case 3 : Combination of 1 and 2

1. Projected Payback Period

Year	Net Income	Cumulative
1 (2010)	143,490.53	143,490.53
2 (2011)	72,882.64	216,373.17
3 (2012)	122,604.44	338,977.60
x		386,881.00
4 (2013)	172,185.57	**511,163.17**
5 (2014))	234,417.38	**745,580.55**

$$\frac{X-1}{2-X} = \frac{386{,}881.00 - 122{,}604.44}{511{,}163.17 - 386{,}881.00} = \frac{161{,}352.98}{12{,}565.25} = 2.3$$

X-1 = (2-x) (2.3) = 4.6 – 3x

X+ 3X = 4.6+ 1.0
4X = 5.6

X= 1.4 years

Rate of Return

ROI = Average Net income/ Initial Investment

	249,358.66	249,358.66
	386,881.00	0.6445
ROI = 64%		**0.64**

3. Net Present Value

PV Factor of 1@ 10%

Formula: PV=1/(1+i)

Where, i = interest and n = year

YEAR	Annual cash inflows	PV of 1 @ 10%	PV of Cash flows
Y1 (2010)	236,254.04	0.9091	214,778.55
Y2 (2011)	116,397.49	0.8264	96,190.88
Y3 (2012)	199,848.84	0.7513	150,146.44
Y4 (2013)	199,848.84	0.6830	136,496.76
Y5 (2015)	320,331.01	0.6209	198,893.52
Total Present Value of Cash Inflows			**796,506.15**

Less: Cost of Investment			**386,881.00**
Net Present Value of the Project (Positive)			**409,625.15**

Table 33: Summary of Decision Parameter Results of Evaluation of Capital Investment

Case	Payback Period	Return on Investment	Net Present Value
0	1.5 years	81.36 %	1,061,649.96
1	1.8 years	50%	583,932.99
2	2 years	64%	810,755.65
3	1.4 years	64%	409,655.15

Return on Investment

Normal operation (Case 0) shows 81.36% Return on Investment, while 50%, 64%, 64% for Case 1, 2 and 3 respectively.

Payback Period

Case (0) shows that a 386,881.00 investment can be recovered in 1.5 years . While case 1,2, and 3 be recovered in 1.8, 2 and 1.4 years respectively.

Net Present Value

Case (0) shows positive NPV which is (+) 1,061,649.96 while Case 1, 2 , and 3 showed positive values of (+) 583,932.99, (+) 810,755.65, (+) 409,655.15 respectively.

PART 7: SOCIO-ECONOMIC

7.1 Brief Introduction

The socio-economic impact of the project will be established clearly to determine the benefits that would be just to the various stakeholders of the business. Aside from being viable, the project should also focus on the social and other economic benefits. This part of the study of the study details the socio –economic contribution of the project to the people of Zamboanga, to the City Government and other beneficiaries.

As Philippines is concerned, Filipinos` ethical standards are very high. Even the advanced western nations have much to learn from the Philippine philosophy. Honesty, in general, is regarded as the best policy. But business ethics of Filipino people are not very much appreciable. It is true that some successful business magnates, such as Ayala, Lopez, Tan, Gokongwee & Soriano, in their later years turned to Philanthropy and the service of society; but this occurred only after they had achieved their goal of accumulating great fortunes and building gigantic industrial empires.

As a matter of fact, the proposed business practices will undergo an evolutionary process. The Proponent hopes and believes that this process will work to the advantage of the individual, the group and society.

In order to have a better peep into the nature of obligations, it would be in the fitness of things to divide the entire society into three groups, a.) Workers are the pillars of the business, b.) Consumers and c.) government, the representative of the community.

Workers are indeed, the pillars of the business ; they are important part of the organization to which they belong. It is therefore, it is very necessary to keep them satisfied and gave them their due, for instance, the ethics of salaries and wages dictate that an employee is entitled to be paid for his productivity. The wages must be fair so that the labor might be in a position to enjoy a civilized living.

Distribution is meant for consumption, and hence the satisfaction of the consumers should be the primary concern of the proposed business. It is really the pious right of the consumers to have greater, better and cheaper goods, and it is the responsibility of the proposed business to fulfill their ambition.

Government is the guardian of the community. In order to serve the community better, government should have adequate funds; taxation is a proper means to secure the funds. The proposed ginger farm will be adhered with Bureau of Internal Revenue`s rules and regulations and will pay all taxes on time.

The proposed business`s vision enshrines the proponent long-held philosophy of Profit with Honor **(PH)** and Unity with Zeal **(UZ)** . The proposed business will generate wealth and profit for its owner at the same time fulfill the proponent responsibilities and commitments to the customers, employees, suppliers, sales agents, government and environment.

7.2 Tangible Contributions

7.2.1 Income Tax Generation

The project under normal operation gives benefit to the local government through income taxes. An average income tax of P 97,136.9906 per year, this can be used for the government projects such as hospitals, roads, schools and other infrastructure projects.

7.2.2 Employment Generation

This project employs ten (4) personnel to earn additional income and uplift their living conditions.

7.2.3 Sales Generation

The project provides great opportunities to other businessmen in earning additional income. The proposed project with a net income in normal operation is P 272,064.02 in year 1, P 229,405.82 in year 2, P 284,571.71 in year 3, P 346,853.27 in year 4, and P 417,036.74 in year 5.

Intangible Contributions

The business establishment will be known as socially responsible activities. It will help retail stores particularly sari sari store to have convenience in the selling of the products near the homes of the end users.

PART 8: Summary, Findings, Conclusions and Recommendations

8.1 Brief Summary

The primary objective of the study is to determine the feasibility of establishing a “ Barbershops ship” in Zamboanga City. After a thorough consideration of the important aspects of the study such as Marketing aspect, Organization and Management aspect, Technical Aspect, Socio Economic Aspect, and Financial aspect

8.2 Findings:

After an attentive calculation and estimation of essentials data and figures on the proposed business with regards to the financial aspects. Case scenarios were given wherein its purpose is to comprehensively analyze the financial position of the business to test its profitability, liquidity and stability. Upon the application of these analytical tools, it was then found out that the proposed business is feasible because the favorable status it shows based from the normal operation analysis to the sensitivity analysis.

This was proven thru the positive yield on the decision parameters illustrated on the summary. The net present value (NPV) analysis is sensitive to the reliability of future cash inflows that an investment or project will yield. And accordingly if the NPV of a prospective project is positive, it should be accepted. The proposed business also shows positive result because the payback period is shorter than the maximum periods of time.

Operating margin is a measurement of what proportion of business revenue is left over after paying for variable costs of production. Businesses that are able to expand their net margins over time will generally be rewarded with share price growth, as it leads directly to higher levels of profitability. It requires monitoring of its figures because the higher the margin, the better. In this business projection, it was determined that the margin was predictably increasing and the business was earning from the projected sales.

The current ratio can give also a sense of the efficiency of a business operating cycle or its ability to turn its product into cash. Business that have trouble getting paid on their receivables or have long inventory turnover can run into liquidity problems because they are unable to alleviate their obligations. In this proposed business it reflects that it has a higher current ration wherein an indication that the business is unable to pay its obligation.

8.3 Marketing Aspect

The marketing strategy aimed of the business will be designed to create an image synonymous with quality. The proposed project will create a quality service at reasonable price. The proposed business and Pepsi Cola company play important roles assuring the levels high service and customer satisfaction. This aspect shows that there is indeed a huge potential demand for the product against the initial supply of the project. The survey has shown positive result to claim and support this project. To ensure its success and endure competitiveness, the proponent institutes effective marketing strategies and sound management.

8.4 Organization and Management Aspect

The project will adopt a Sole Proprietorship form of the organization which is functional in nature. Personnel requirements, descriptions and specifications were established to get the right person for the right job. Compensations and benefits were given such as SSS, Pagibig, Philhealth, 13^{th} Month pay, working policies, rules and regulations are lucid to all employees , hence the operation run smooth.

8.5 Technical Aspect

The proposed project will be operating in the west coast of Zamboanga City. And will have one (1) truck, two (2) push cart and will be operating on a commission basis.

As gleaned from table Summary or Decision parameters, the proposed project under normal operation (Case 0) yielded a 81.36 % Return on Investment,(ROI) Payback Period (PP) of 1.5 years and a positive Net Present Value (NPV) of 1,061,649.96. This means the project's total investment of P ___________________ earns an average of for every 100.00 investment and can be fully recovered in just 1.5 years . overall, the above mentioned parameters under normal condition (Case 0) manifest that the venture is highly profitable and liquid in meeting its short and long term obligations.

In case 1 when revenue is decreased by 10% the ROI is reduced to 50% and can be fully recovered for 1.8 years. The positive NPV of 583,932.99, suggests that the project is still acceptable, generally, the venture is still profitable and liquid.

In case 2 when operating expenses is increased by 10% , the ROI is reduced to 64% and can be fully recovered for 2 years . The positive NPV of 810,755.65 suggests that the proposed project is acceptable. As a whole , the venture is profitable and liquid.

In Case 3, when the worst case scenario would happen which means that the operating expense is increased by 10% and revenue is decreased by 10%, the ROI is reduced to 64 % and can be recovered for 1.4 years. The positive NPV of 409,655.15 still suggests that the project is acceptable.

8.7. Socio- Economic Impact

The proposed project contributes to the socio-economic status of the community particularly in the west coast of Zamboanga City. The project generates income tax to provide employment , to give opportunities to businessman in terms of sales and help stabilize supply of soft drinks in the area.

8.8 Recommendation:

After careful consideration and critical study, the researcher's hereby conclude that the proposed business “Barbershops ship” is highly feasible and profitable. As a result, it is highly recommended that proponents will go on with the business operation. Furthermore it is recommended that:

Partnership shall be done in accordance with the existing law of the Philippine Government.

Any decision pertaining to the business operation shall be determined the proponent

Appropriate and effective Marketing Strategy shall be developed to promote the products and increase profit.

The goal of providing affordable but quality products shall always be uphold at all times.

On time delivery of products shall be an observed protocol.

Inventory of products shall be done on monthly basis.

Medical examination should form part of the hiring procedure. Only those that passed the requirements shall be employed.

Employees should be trained on proper handling of customers satisfaction and relations,

Proper dress code must be observed by the employee during working hours.

Working Area shall be kept clean all the time.

Ensure the proper implementation of personnel policies and procedures.

The cash flow should be monitored by the Manager to ensure smooth and safe remittance of cash.

Operational plan shall be observed such as sales and delivery.

The Manager shall monitor submission of accurate and timely report from the company's helper.
