

GINGER-LEMONGRASS SYRUP

A Feasibility Study Presented to the Faculty of the
Department of Financial Management
School of Accountancy and
Business Management
Saint Louis University
Baguio, City

In Partial Fulfillment of the Requirements
of the Course Feasibility Study
(Finman 9C)

By:
Rodrigo, Marla Gail A.
Sierra, Stephanie D.

December 2016

ACKNOWLEDGMENT

The proponents would like to express their sincere gratitude and appreciation to those who have extended their help, support and encouragement all throughout the completion of this feasibility study.

To the Heavenly Father who became the source of will, courage and wisdom, and who kept them safe from harm during the process of this undertaking, they dedicate this accomplishment to His greatness.

To their dearest adviser who gave them guidance, imparted constructive criticisms, and unbiased appreciation of their efforts and work, they will truly keep all the learning even after the years spent in the university.

To their families and friends who have also been very supportive in lending help in every possible way, the proponents whole-heartedly dedicate this work to them.

And to all the respondents who have answered kindly to our requests, this would not be effective without their actual participation in the study, thus, the proponents extend their utmost thanks to each and everyone who have contributed in this study.

CHAPTER I

PROJECT SUMMARY

Introduction

Syrups are more than just any ordinary sweeteners, these are but infused syrups that are the ultimate flavor-booster for mixed drinks or cocktails, coffee, tea, juice, even cakes, ice cream sundaes, whipped creams, glaze to doughnuts and more. Health-wise, herbal and medicinal plants are one of the best options for most consumers, such as Ginger and Lemongrass. Thus, a feasibility study is conducted to determine the viability of Ginger-Lemongrass Syrup.

This chapter embodies the name of the enterprise, its logo, location, the project's descriptive definition, long term objectives, feasibility criteria, highlight of the project, and the timetable. Moreover, integrating together with the national and local programs applicable and beneficial to the existence of the business, and the major assumptions, summary and conclusion in accordance to the market, technical, financial, socio-economic, and management of the project's feasibility.

A. Name of the Enterprise

The name "Gingertwee Enterprise", highlights the main ingredient of our product, Ginger – Lemongrass Syrup. The word "Twee" represents the child pronunciation of "sweet" which also means excessively or affectedly quaint, pretty, or sentimental, and sweet. The enterprise wanted to portray a natural and wholesome image along with a lighthearted new name that may be known and remembered by people, young and old.

B. Location of the Enterprise

The proponents have agreed upon establishing the enterprise, that the production and operation site will be at Unit A, located in No.17 Bonifacio Street, A. Bonifacio-Caguioa-Rimando, Baguio, Benguet. This location is a commercial property for rent that provides easy travel for restocking of raw materials and delivering of finished products to merchandising firms, retail stores and markets. A wide-range of customers will have the familiarity of the establishment, as schools, malls and other establishments are very near the location.

C. Vision-Mission Statement

VISION

Our vision is to become the pioneer producer of organic syrups in the whole City of Baguio and in the Philippines.

MISSION

Our mission is to provide quality and 100% natural syrups to public markets and independent grocers, and to support the consumption of healthy food and beverages throughout Baguio City and the Philippines.

D. Logo of the Enterprise

Figure 1. Logo of the Enterprise

The logo exemplifies all its organic and natural attributes, beginning with its color choice to every image it represents. The ginger aligned in the above center portrays a crown, which means that glory awaits in the future ahead. The lemongrass embracing the whole inner part of the image shows that everything else within are of importance. While the colors represent everything natural and organic, the dark-yellowish color represents the product of the company itself. And the product of our love and passion for work, the syrup, having poured out by a single spoon of which reflects the only provider of all great things, our Lord God.

E. Descriptive Definition of the Project

I. Related National Program

a. Go Negosyo (Philippine Center for Entrepreneurship)

This program is established by the Micro, Small, and Medium Enterprise Development (MSMED) Council who encourages public-private partnerships (PPPs) in the establishment and management of Negosyo Centers. While conducting expos such as Go Negosyo Mentor Me Program in key cities here in the Philippines, it also goes on with wider interaction through forums and mentoring sessions between participants and the

entrepreneurs of Go Negosyo Program, focusing more on the development of entrepreneurship.

Small entrepreneurs are offered with free business registration assistance and product development, marketing, assistance to finance and business management, and business information and advocacy such as technology transfer and training/seminar assistance. On the basis of this program, Gingertwee enterprise may apply for the services offered and attend the seminars provided by Go Negosyo in DTI's Negosyo Center, Regional Office, and Baguio City.

b. Young Entrepreneurs Society (YES) Philippines – Membership

The Young Entrepreneurs Society is an organization established to educate, promote, encourage, network, and develop aspiring and successful entrepreneurs for excellence in business and professional growth. The organization provides a number of membership benefits through Monthly Networking and Executive forums through peer-to-peer learning and support, Quarterly learning events such as seminars on Business Planning, Marketing Strategy, Entrepreneurial Finance, and People Management. They also provide Online and personal training with free business pointers and tips from YES Philippines mentors and business coaches from different countries, business workshops, and Opportunities exchange.

Through adhering to the membership benefits of YES Philippines, the proponents are looking forward to attend the workshops, training programs and seminars provided by the organization, most especially, with its Opportunities exchange where the proponents may post business opportunities online for promotion of a wider network.

c. Work Attitude and Value Enhancement (WAVE) Program

The WAVE program by Business Coach, Inc. is based on the Corporation Code of the Philippines approved by the SEC. WAVE program allows the proponents to discover personal vision, mission and values that is aligned with the organization. The program reviews each of its participants from work values to corporate values and the components of ethical decision-making. Experiential learning experiences makes the participants discover their own work value system. Seminars on responsibility to others in the workplace, work productivity, decision making and even individual and corporate survival are offered by the Business Coach, Inc. as work organizations chart their course in the competitive global marketplace.

Through registering and joining Business Coach, Inc's programs, the proponents will learn more about how they can influence the strategic goals of their organization using the appropriate work attitude and values to achieve excellence for Gingertwee's future application.

II. Affinity to Regional or Sectoral Studies

a. DOST - Academe Technology Based Enterprise Development (DATBED)

This program initiated by the Department of Science and Technology (DOST) develops entrepreneurial competencies among students in selected academic institutions. DATBED supports income generating projects with technological innovation that are yet tested in the market but with market potential and technically viable when commercialized. The program's objective is to train students in enterprise development by providing them financial assistance for the establishment of technology-based enterprises.

This is an absolute help for the proponents being as young entrepreneurs, in lieu of learning from seminars, stages under DATBED are complied with accordingly. The first stage covers a period of three years for enterprise training and development, and the second stage are extensions of financial assistance, if there is a need for funding, to fully commercialize and promote the enterprise. Accordingly, the financial assistance should be paid back by the student through the Academic Institution which determines the terms of repayment.

b. Training Enhancement for Competitiveness in Harnessing Innovative Entrepreneurs (TECHIE)

The project TECHIE by the Department of Trade and Industry is a project under Region I that is to enhance competitiveness of SMEs thru technology trainings, to enhance global presence thru website promotion of products and services, to provide skills in electronic promotion of collaterals / materials, and facilitate E-Commerce transactions. The project also aims to strengthen market promotion, research through the use of websites and other applications.

The proponents adhere to the program with its IT-enabling trainings, allowing us to learn more of the modern advertising and promotion of our products through web development for Electronic Brochures / Bulletins, and to improve with our operations, and lessen operational cost through the use of available technology and application.

II. Project Potential and Proponents

In the creation of the Gingertwee Enterprise, since there is an increasing demand for organic, safe, and natural products, the partners came up with making what most consumers need and want, all the more in terms of food and beverages. The Ginger-

Lemongrass Syrup by Gingertwee is rich in anti-oxidants, and lemonal or citral, which contains anti-fungal and anti-microbial qualities, also having the ability to support healthy cholesterol levels, cleanse and detoxify. According to a study in Georgia State University, ginger extracts having anti-inflammatory and anti-oxidants, are proven to have anti-cancer agents and was revealed to shrink prostate tumor size by 56%. And since Gingertwee's syrup is a fusion of Ginger and lemongrass natural extracts, this product is very versatile since it has several household uses, as such are for food and beverage sweeteners, for teas, cocktails, pancakes, doughnuts, and more.

F. Project Long Range Objectives

In a period of ten (10) years, the Gingertwee Enterprise aspires to achieve the following objectives:

- Purchase additional machine and equipment such as a “Helicoidal Juice Extractor” which has a unique spiral design ensuring a high yield juice recovery without making it bitter, a Syrup Making Machine and Labeling Machines for Syrup bottles.
- Innovate through improved research and development studies such as introducing a variety of simple syrups that are unique and creative. Providing of which are ideas such as making floral syrups, and products possible aside from syrups (i.e., candies, powdered sweeteners, etc.)
- Form more and new contracts to established supermarkets, and also cater cake and bake shops in Baguio City.

G. Feasibility Criteria

One of the Gingertwee Enterprise's core reasons of existence is to obtain and benefit from the profits gained from its operation. Upon the benefit of which, the proponents of the enterprise concluded to allocate its reserves for further innovation of quality performance in producing quality products, and compete therewith to other similar entities. Being able to compete and survive among the many errands of all enterprises succeeds in gaining advantage in comparison to others. The proponents of the enterprise aims for success with its product, Ginger – Lemongrass Syrup as it creates a new image and taste for any ordinary syrup found in the market. Being made of natural raw materials containing no harmful chemicals, the project aims to interest new customers for its uniqueness, number of benefits, and uses. With the survey provided, most respondents (residents of Baguio City) are willing to buy and try the product. Thereby, having an immense probability of increasing the product's familiarity to a wide range of customers, and be known as the pioneer of herbal and medicinal syrups.

H. Highlights of the Project

1. History of the Project

Choosing the right product is really difficult. Unaware that the conversation went to some other topics, one of it is about a rhizome plant, ginger root or simply ginger. Since the researchers wanted to add a little twist to a syrup, the researchers decided to add something that the people would want to try or had to come up with something new and unique. The researchers figured out that if syrup would be more than just a sweet flavoring, it would attract the attention of buyers. So, the group thought of how it can be consumed

by people easily with its nutrient still intact while having a low price. Thus, the researchers came up with a health-benefit syrup.

2. Project Timetable and Status

a. Project Proposal and Feasibility Study (August 2016 – December 2016)

Before starting the business, conducting a research is essential to be able to produce a product that will easily be marketable and profitable as well. The proponents will try to make the product just right as possible during this time for the preparation of starting the business. Through research is needed to be able to produce a product that has the potential to be the best selling product. The proponents gathered necessary data needed for the study such as the floating of questionnaires answered by the respondents. This study also helps the proponents to know whether the project is feasible or not.

b. Procurement of Funds (October 2016)

The funds that will use to start the business will be used to generate to begin the enterprise. The proponents will each contribute money from their personal funds with the help of their family, relatives and friends.

c. Business Registration and Licenses (1st and 2nd week November 2016)

Before starting the operations of the business, the enterprise should complete several requirements and go through legal processes. In order for our business to operate legally, the proponents will register the business in Securities and Exchange Commission for the business name, other permits includes the Application for Partnership, Business

Permit, BIR, Working Permit, Fire Inspection Certificate and Sanitary Permit. These documents will be secured from different government agencies in the city.

d. Selection and Hiring of Employees (3rd week and 4th week of November 2016)

The enterprise will hire employees who possess the required qualifications set by them. The employees will also be oriented with the work they are engaged in like familiarizing them with the equipment in the working area. It will take three weeks to select and hire employees to ensure the production is efficient and effective.

e. Purchasing of Equipment, Furniture, and Raw Materials (1st and 2nd week of December 2016)

The allotted time to improve the working area and to acquire equipment, furniture, and raw materials. It will take us one week in total.

f. Advertising and Promotional Activities (3rd and 4th week of December 2016)

This period will be used to promote the enterprise and the product to be offered. One month is allotted for advertising and promotional activities before the start of operation to let people know about the enterprise. Advertising will be through distributing of flyers on different establishments, and posting advertisements through social media websites that will help promote the enterprise and the product as well.

g. Start of Business Operation (January 2017)

The enterprise will start its operations and is ready to serve the target market. An opening event will be held on this day, providing free tastes of the product and discounts.

3. Nature of the Industry

The Gingertwee Enterprise belongs to the condiments industry in which it produces Syrup with ginger and lemongrass extract. Since the business is involved in making syrup products to be delivered and distributing the products into different stores, supermarkets and in the public market within Baguio City. The enterprise will be under the small-medium enterprise that desires to delight customers and to offer them product that is delicious, affordable, and at the same time full of health benefits needed by every individual.

4. Mode of Financing

The funds for the project will be coming from each of the member's capital contribution. They will equally contribute an amount of Php105,000.00 which would be in the form of cash. It will come from the proponents' personal savings and borrowed from the family.

5. Investment Cost

The partners will contribute equally for initial capital investment which will amount to a total of Php210,000.00. The cash contributions will be used for the purchasing of the raw materials, machineries and equipment, tools, furniture and fixtures and supplies, and others which is necessary for the start of operation of the business. The procurement of fund will start immediately after the end of first semester. Any excess in the fund will be used for precautionary motives.

Major Assumptions and Summary of Findings and Conclusion

1. Market Study

Market study analyzes market demand for a particular product. Its demand and supply status must be considered to constitute such structure. In entering the market, the enterprise must have strategies on how to introduce the product to the public by making promotions such as advertisements in social media, posters and banners in different supermarket and grocery stores within Baguio City. The name of the product must be considered in a way that it is easy to catch the attention of customers. The price must be affordable and fit to the quality of product. The enterprise must also consider the factors affecting the market like the taste and preference, consumer, price, cost, machinery malfunction and the marketing program are not neglected for it will cause delay in delivering the product and it will lead to loss of customers.

2. Technical Study

The Gingertwee Enterprise is involved in making syrup particularly the ginger-lemongrass syrup in which the main ingredients used by the enterprise are ginger and lemongrass which are most available in the market. The plant location and plant layout, the structure's specification, the raw materials to be used by the proponents to start the enterprise is also defined in the next chapter.

The enterprise will operate eight (8) hours a day from 8:00 am until 5:00 pm, Mondays to Fridays. The price of the product is Php60.00 per bottle. The total project cost will be Php 210,000. This includes all current and non-current assets, expenses of supplies and raw materials needed for one month operation. The cost may vary from time to time because of

ever changing market but the proponents are willing to stabilize its production and price by looking for ways to lower the cost and not affecting the quality of the product. All the tools, utensil, machineries and equipment needed would be bought so that the production will be faster.

3. Financial Study

The preparation of financial statements and schedule which serves as proof of profitability of the business is found in this section. This presents the very details of the accounts and transactions that concern the business.

The financial study determines the profitability of the project. It will show the information on the total project cost, initial capital and financial analysis of the project. It illustrates how the business will be financed so that it will be managed and will earn through the years of its operation from its opening. The proponents are finding ways on how to have the least cost possible but will be able to maximize profit. The study of the finances shall make sure that the proposed business will be feasible and can be launched in the market.

4. Socio-economic Study

In putting up a business, it is not always gaining income but is also about contributing to the economy of the country. It will have to consider if the community have something to gain so as the enterprise.

The Gingertwee Enterprise sees to it that it contributes to the general welfare of the society by opening job opportunities in the community, paying taxes to the government,

introducing a product to the public that can help improve their health in the form of a syrup and by following proper waste disposal in a way that it will not cause harm to the health of the people in the community and as well as with mother nature.

5. Organizational and Management Study

The Gingertwee Enterprise is comprised of 2 proponents who shall divide the profit and loss equally. Partners are also part of the employees of the business. Each of them has their own parts which will be in the financing for the management and for the sales and operations. They have their own share of work until the business will grow. There will also be two (2) helpers that are to be employed and chosen according to their job qualification to run the operations of the business. They must work at 8:00am to 5:00pm with one hour lunch break from 12:00noon to 1:00pm and two 15- minutes break in the morning and in the afternoon. Employees must observe punctuality at the official time set. Non - attendance of a working day by any reason shall be considered as absence unless there is a written application for leave and if circumstance is under forced leave or by reason of emergency, ailment or fortuitous event. All employees are open to a 15-day leave without pay in a year. For sick leave, 3 days will require a medical certificate from an attending physician. In case of accidents within the premises of the business establishment, the company shall assume liability. There will also be sanctions for violations of unauthorized absences and misconduct in the enterprise.

g. Start of Business Operation						

CHAPTER II

MARKET STUDY

Introduction

Market study determines the marketability of the project and it is considered to be the overall result of the enterprise. It provides information to identify the price of the product and how the demand and supply will respond to the price changes. This chapter presents the product's name, properties, uses, geographical dispersion and the computation of demand and supply analysis. With this information it will determine the marketing programs and different factors affecting the market of the product.

A. Product description

a. Name of the product

The name of the product is “Ginger-lemongrass Syrup”, the proponents have chosen this name because of the main ingredients of the product which are ginger and lemongrass. The proponents combined the word ginger and lemongrass to let potential customers to discern immediately what the product is, in which it will encourage them to avail the product.

b. Properties of the product

The Ginger Lemongrass Syrup is composed of ginger and lemongrass which are beneficial to our body. Ginger is called ginger root or simply ginger and it is commonly used as spice. One important contents of ginger is the “gingerol” which is a bioactive compound that it has powerful anti-inflammatory and antioxidant effects to our body. The

following are common benefits of ginger: it lower blood sugar and improve heart disease risk, it also reduces muscle pain and soreness, it can also help treat Chronic indigestion, and etc. another component of the product is the lemongrass, which is also beneficial to our body because of its medicinal properties including analgesic, anti-inflammatory, antidepressant, antipyretic, antiseptic, antibacterial, antifungal, astringent, carminative, diuretic, febrifuge, galactagogue, insecticidal, sedative, and anti-cancer properties. The following common benefits of lemongrass are: it helps digestion, control cholesterol levels, cleanses and detoxifies, heals colds and flu, fights cancer, and reduces arthritis pain.

The packaging material of the product is a plastic bottle with a plastic cover in which it can be recycled and it is 375ml.

c. Uses of the product

Ginger Lemongrass Syrup is an ultimate flavor-booster for mixed drinks or cocktails, coffee, tea, juice, even cakes, ice cream sundaes, whipped creams, glaze to doughnuts and more. All the health benefits of ginger and lemongrass are present in every serving of the product. The product can be consumed any time of the day either breakfast, lunch or dinner.

d. Users of the product

The primary users of the product will be the household population because the product could be usually used inside the house and share by the family. The enterprise will be catering any age group who wishes to avail the product and it has no specific gender consumer. The product caters to all people who reside in Baguio City and those who come and visit the place.

e. Geographical areas of dispersion

The Ginger Lemongrass Syrup will be found at selected supermarkets and different stores in Baguio City that sell organic products. The place of production will be at Unit A, located in No.17 Bonifacio Street, A. Bonifacio-Caguaioa-Rimando, Baguio, Benguet.

B. Demand analysis

In the analysis of the demand for the product, GINGER-LEMONGRASS flavored syrup, the proponents held a floating of questionnaires in the different households of Baguio City. The proponents have conducted an analysis on demand to determine the familiarity of the target market to the product, and the units they are likely to purchase. This also led the proponents to obtain the current total number of household population of Baguio City regardless of age or gender brackets. The result from the Historical Demand and Projected Demand illustrates that there is a direct relationship between population and demand, thus having an increase in population means an increase in demand. And with this analysis, the Gingertwee Enterprise shall take the opportunity to commence its operation in Baguio City.

Table 1

Historical Household Population

YEAR	Historical Household Population
2011	79,906
2012	81,848
2013	83,837
2014	85,874
2015	87,961

Table 1 shows the Historical Household Population of Baguio City from the years 2011 to 2015. The information on the five-year projected population was taken from the office of the Philippine Statistics Authority in Baguio City. The Household, as the chosen target market, is mostly known to consume products in lined with condiments used in preparing food and beverages, and one of such is syrup.

With the basis of statistics, the Slovin's Formula was used to arrive with the sample size of the study as shown below, and the margin of error having a 5% rate.

Slovin's formula

$$n = \frac{N}{1 + Ne^2}$$

$$n = \frac{87,961}{1 + 87,961(0.05)^2}$$

$$n = 398.1892 \sim 399$$

Where: N = the total household population of Baguio City

e = the degree error

n = the sample size

In the computation above, the computed sample size is 399 from the total population of Baguio City on 2015, which will be the basis of the total number of questionnaires to be distributed.

Table 2

Historical Demand

Year	Population	Percentage of Consumption	Consumption Rate	Historical Demand
2011	79,906	72.50%	23	1,332,432.55
2012	81,848	72.50%	23	1,364,815.40
2013	83,837	72.50%	23	1,397,981.98
2014	85,874	72.50%	23	1,431,948.95
2015	87,961	72.50%	23	1,466,749.68

The table shows the Historical Demand in 5 years. The values shown for Historical Demand are computed by multiplying the Historical Household Population, Percentage of Consumption, and the Consumption Rate. The table also shows that as the Population of Household increases, the Demand for Ginger-Lemongrass Syrup increases. With a total of 400 respondents, 72.50% claimed that they use Syrups in their household.

Table 3 shows the Cross Tabulation on how often the household of Baguio City consume Syrup based on the period in weeks and months in the table, and the quantity consumed in milliliters (mL). Based on the Survey conducted, the findings show that most of the respondents often buy 1 bottle of 375mL syrup every month.

Table 4

Annualized Cross Tabulation

	250 mL				375mL			
	1	2	3	4	1	2	3	4
One Week	-	78,000	-	-	838,500	78,000	-	-
Two Weeks	78,000	52,000	19,500	-	9,750	-	-	-
Three Weeks	59,500	8,500	-	-	44,625	51,000	-	-

Seven Months	-	-	-	-	-	1,836	-	-	2,550	-	-	-

One Year	-	2,000	-	-	-	2.160	-	-	6,000	-	2,250	-
Total	435,700	175,000	-	-	27,216	21,276	-	-	98,550	18,000	2,250	-
Total	610700				48,492				118,800			

The Annual Consumption Rate is computed below:

Computation of Usage Rate	Totals
Total Annual Consumption (in mL)	
250mL	371,000
375mL	1,370,925
500mL	610,700
540mL	48,492
750mL	118,800
Total Annual Consumption:	2,519,917
Divide by mL of proposed packaging	375
Annual Consumption of Respondents (in mL)	8,689
Divided by: No. of Respondents Consuming Syrup	290
Annual Consumption Rate (in mL):	<u>23</u>

The tables show the consumption of syrup every year which is computed by adding the totals of the multiplied bottle size (in mL), the quantity or number of bottles consumed, the period of consumption, and the number of consumers referred in the cross tabulation. Table 4 shows the Total Annual Consumption or usage of syrup is 2,519,917 in mL and the Annual Consumption rate is 23, the computation is shown above, this means that on the average, a person consumes 23 bottles of syrup every year.

This is a relatively positive result since one (1) person consumes almost three (3) bottles a month or one (1) bottle of syrup a week.

Table 5

Frequency Distribution on the Number of Respondents Who Uses Syrup

Response	Number of Respondents	Percentage
Yes	290	72.50%
No	110	27.50%
Total	400	100.00%

Table 5 illustrates that there are 290 out of 400 respondents who consume syrup with an equivalent rate of 72.50%, this implicates that majority of the respondents from the survey are potential buyers.

Table 6

Frequency Distribution on the Sizes and Quantity the Respondents Buy Syrup

Responses	No. of Respondents	Percentage
250mL	61	21.03%
375mL	135	46.55%
500mL	67	23.10%
540mL	11	3.79%
750mL	16	5.52%
TOTAL	290	100.00%

Table 6 shows the size and the quantity of syrup bottles that the respondents usually buy. Based from the data above, the size of syrup bottle purchased most by the respondents is the 375mL bottle. For the quantity, most respondents usually buy one (1) bottle of syrup a month. Thus, the proponents decided to produce the 375mL bottles of syrup.

Table 7

Frequency distribution on the Length of Time of Consumption of Syrup

Response	Number of Respondents	Percentage
One Week	52	17.93%
Two Weeks	24	8.28%
Three Weeks	51	17.59%
One Month	127	43.79%
Others: Two Months	12	4.14%
Three Months	2	0.69%
Four Months	1	0.34%
Five Months	3	1.03%
Six Months	6	2.07%
Seven Months	3	1.03%
One year	9	3.10%
Total	290	100.00%

In Table 7, the data on the length of time of consumption shows the result of most respondents consuming the product for one month. This is a positive result since most potential buyers consume this fast, and purchase more of the product in a short period which is less than a year. The proponents have also found that the product will last up to four (4) months at most.

Table 8

Frequency Distribution on the Willingness to Buy the GINGER-LEMONGRASS SYRUP

Response	Number of Respondents	Percentage
Yes	321	80.25%
No	79	19.75%
Total	400	100.00%

Table 9 shows the willingness of the respondents to avail the product. The result provides that 321 out of 400, that is 80.25% of the respondents are willing to purchase the product. This makes the product marketable to the household of Baguio.

Table 9

Summary Table of Standard Deviation for Demand

Method	Standard Deviation
Arithmetic Straight Line	1,050.02
Arithmetic Geometric Curve	32,699.68
Statistical Straight Line	673.69
Statistical Parabolic Curve	7.13

Table 9 shows the summary of standard deviation based on the different statistical methods used. These methods were namely, Arithmetic Straight Line, Arithmetic Geometric Curve, Statistical Straight Line, and Statistical Parabolic Curve. Given the Standard Deviations from these methods, the Statistical Parabolic will be used by the enterprise since it has the lowest risk of getting errors and can provide a more accurate and realistic demand for the product.

Table 10

Standard Deviation of Statistical Parabolic Method

Year	Y	X	X ²	X ⁴	XY	X ² Y
2011	1,332,432.55	-2	4	16	-2,664,865.10	5,329,730.20
2012	1,364,815.40	-1	1	1	-1,364,815.40	1,364,815.40
2013	1,397,981.98	0	0	0	0.00	0.00
2014	1,431,948.95	1	1	1	1,431,948.95	1,431,948.95
2015	1,466,749.68	2	4	16	2,933,499.35	5,866,998.70
TOTAL	6,993,928.55	0	10	34	335,767.80	13,993,493.25

a	+	b	(x)	+	c	X ²	=	Yc	Y - Yc	(Y - Yc) ²
1,397,981	+	33,577	(2)	+	403	4	=	1,332,437	-5	23
1,397,981	+	33,577	(1)	+	403	1	=	1,364,806	9	82
1,397,981	+	33,577	0	+	403	0	=	1,397,981	1	2
1,397,981	+	33,577	1	+	403	1	=	1,431,960	-11	120
1,397,981	+	33,577	2	+	403	4	=	1,466,744	5	27
TOTAL										254

Where:

$$a = \frac{(\Sigma X^4)(\Sigma Y) - (\Sigma X^2)(\Sigma X^2 Y)}{n(\Sigma X^4) - (\Sigma X^2)^2}$$

$$b = \frac{\Sigma XY}{\Sigma X^2}$$

$$c = \frac{n(\Sigma X^2 Y) - (\Sigma X^2)(\Sigma Y)}{n(\Sigma X^4) - (\Sigma X^2)^2}$$

$$Yc = a + bx + cx^2$$

$$\text{Standard Deviation} = \sqrt{\frac{\Sigma(Y - Yc)^2}{\text{Total no. of years}}} = \sqrt{\frac{254}{5}} = \underline{\underline{7.13}}$$

Table 10 shows the computation of standard deviation using the Statistical Parabolic Method. This method resulted the lowest standard deviation which implies to have the least degree of error, this is also the most favorable method to use in projecting the demand for the next years of operation.

Table 11

Projected Demand Using Statistical Parabolic Method

Year	A	b	X	C	X ²	Y _c
2016	2,085,653	50,093	3	601	9	2,241,338
2017	2,085,653	50,093	4	601	16	2,295,636
2018	2,085,653	50,093	5	601	25	2,351,135
2019	2,085,653	50,093	6	601	36	2,407,835
2020	2,085,653	50,093	7	601	49	2,465,736

Table 12 shows the computation of the projected values for getting the actual projected demand. Where Projected demand is computed by adding the value of a, bx, c and X².

Table 12

Actual Projected Demand Based on statistical Parabolic Method

Year	Projected Demand	Percentage of Willingness	Actual Projected Demand
2016	2,241,338	80.25%	1,798,674
2017	2,295,636	80.25%	1,842,248
2018	2,351,135	80.25%	1,886,786
2019	2,407,835	80.25%	1,932,288
2020	2,465,736	80.25%	1,978,753

Table 12 shows the actual projected demand for the succeeding five years (2016-2020). The computation for the actual projected demand is made by multiplying the

projected demand from the Statistical Parabolic Method and the percentage of the household who are willing to avail the Ginger-Lemongrass Syrup. Based on the above data, the highest demand for the syrup is in the year 2020 and the lowest demand is in the year 2016. This means that the increase in the actual projected demand every year results from the percentage of the consumer's willingness to purchase the product.

C. Supply Analysis

Supply is defined as the schedule of how much producers are willing and able to sell at the amount available at a specific price or the amount available across the range of prices. Supply analysis is a marketing study in which it identifies its direct and indirect competitors selling the same product in the market. The existence of the competitors proves the marketability of the proposed product.

Table 13

Distribution of Respondents Selling Syrup

Establishment	Size (mL)	quantity	Monthly sales	Percentage of increase or decrease (%)
A	375	4	1,500	3
			1,500	
B	375	15	5,625	3
			5,625	
C	375	20	7,500	8
	500	20	10,000	
			17,500	
D	500	5	2,500	3
	750	5	3,750	
			6,250	
E	375	2	750	3
	750	10	7,500	
			8,250	
F	375	5	1,875	5
	500	5	2,500	
	750	5	3,750	
			8,125	
Total			47,250	25

Table 14

Annualized Supply

Establishment	Annual Sales (in mL)			Total
	375mL	500mL	750mL	
A	18,000	-	-	18,000
B	67,500	-	-	67,500
C	90,000	120,000	-	210,000
D	-	30,000	45,000	75,000
E	9,000	-	90,000	99,000
F	22,500	30,000	45,000	97,500
TOTAL	207,000	180,000	180,000	567,000

This table summarizes the annual sales of syrup.

Table 15

Historical Supply

Year	Historical Supply
2011	2,338.08
2012	2,439.74
2013	2,545.81
2014	2,656.50
2015	2,772.00

Computation for historical supply for 2015:

= (total annual sale/total number of respondents) * total number of competitors

= (567,000 / 6 / 375mL) * 11

= 2,772

Historical Supply for 2014:

= Historical supply of 2015 * (1-0.04167)

= 2,772* 0.9583

= 2,656.50

Total percentage change	25%
Divide by: number of respondents	<u>6</u>
Average change in sales	<u>4.17%</u>

The above table shows the historical supply of syrup from 2011 to 2015. In computing the historical supply, the total annual sales in year 2016 serves as the base year to be divided by the total number of respondents and the answer will be multiplied by the total number of competitors.

Table 16

Summary Table of Computed Standard Deviation

Methods of Projection	Computed Standard Deviation
Arithmetic Straight Line	6.02
Arithmetic Geometric Curve	44.29
Statistical Straight Line	3.86
Statistical Parabolic Curves	0.056

Table 16 shows the computed standard deviation for each of the four methods needed in choosing the right method of projection. Since the statistical Parabolic method has the least standard deviation, and then it will be the method to be used to get the projection of demand to lessen the risk. It will also be used because it is most likely to come up with the most realistic projection of supply.

Table 17

Computation of Standard Deviation Using Statistical Parabolic Method

Year	Y	X	X ²	X ⁴	XY	X ² Y
2011	2,338.08	-2	4	16	-4,676.16	9,352.33
2012	2,439.74	-1	1	1	-2,439.74	2,439.74
2013	2,545.81	0	0	0	0.00	0.00
2014	2,656.50	1	1	1	2,656.50	2,656.50
2015	2,772.00	2	4	16	5,544.00	11,088.00
TOTAL	12,752.13	0	10	34	1,084.60	25,536.56

A	b	(x)	C	X ²	Y _c	Y-Y _c	(Y-Y _c)
2,546	108	(2)	2	4	2,338	-0.039149	0.001533
2,546	108	(1)	2	1	2,440	0.078060	0.006093
2,546	108	0	2	0	2,546	0.000716	0.000001
2,546	108	1	2	1	2,657	-0.079015	0.006243
2,546	108	2	2	4	2,772	0.039388	0.001551
							0.015421

Where:

$$a = \frac{(\Sigma X^4)(\Sigma Y) - (\Sigma X^2)(\Sigma X^2 Y)}{n(\Sigma X^4) - (\Sigma X^2)^2}$$

$$= \frac{(34)(12,752.13) - (10)(25,536.56)}{5(34) - 10^2}$$

$$= \underline{2,546}$$

$$b = \frac{\Sigma XY}{\Sigma X^2}$$

$$= \frac{1,084.60}{10} = \underline{108}$$

$$c = \frac{n(\Sigma X^2 Y) - (\Sigma X^2)(\Sigma Y)}{n(\Sigma X^4) - (\Sigma X^2)^2}$$

$$= \frac{5(25,536.56) - (10)(12,752.13)}{5(34) - 10^2}$$

$$= \underline{2}$$

$$Y_c = a + bx + cx^2$$

$$\text{Standard Deviation} = \sqrt{\frac{\Sigma(Y - Y_c)^2}{\text{Total no. of years}}} = \sqrt{\frac{0.015421}{5}} = \underline{\underline{0.056}}$$

Table 18

Projected Supply

Year	A	b	X	C	X ²	Yc
2016	954,679	40,673	3	865	9	1,084,484
2017	954,679	40,673	4	865	16	1,131,213
2018	954,679	40,673	5	865	25	1,179,672
2019	954,679	40,673	6	865	36	1,229,861
2020	954,679	40,673	7	865	49	1,281,782

Table 19

Actual Projected Supply

Year	Actual Projected Supply
2016	1,084,484
2017	1,131,213
2018	1,179,672
2019	1,229,861
2020	1,281,782

D. Demand-Supply Analysis

After determining the demand and supply in the market, there is a need to compare the result and get the summations of the projected demand and supply for the years 2016 to 2020.

Table 20
Unsatisfied Demand

Year	Projected Demand	Projected Supply	Unsatisfied Demand
2016	1,205,623	1,084,484	121,139
2017	1,234,830	1,131,213	103,617
2018	1,264,683	1,179,672	85,011
2019	1,295,182	1,229,861	65,321
2020	1,326,327	1,281,782	44,546

Table 20 shows the unsatisfied demand for the next five years of the enterprise. It also shows that the projected supply is lower than the actual demand in which the market cannot supply the demand for the product. Thus, it means that our product has a potential to be marketable. It also indicates that as the actual projected demand and actual projected supply increases, the number of unsatisfied demand decreases.

E. Price Study

Price is one of the primary considerations of consumers in their decision on whether to buy the product or not. It is important to determine the price to be able to meet consumers need as well as to gain competitive advantage in the market.

The proponents will introduce the product at an affordable price. This may attract customers to try and buy Ginger Lemongrass Syrup when weighing their choices. The Ginger Lemongrass Syrup will be sold at Php 60.00 at the size of 375ml. the price covers all the cost and also a 30% mark-up.

F. Factors Affecting the Market

There are different factors that the proponents have considered known to affect the business and the changes it may contribute to the market.

1. Factors Affecting Demand

a. Consumer Taste and Preferences

Health and wellness products in the Philippines maintained its positive development in 2015 based on a market research provided by Euromonitor International. This development continued as manufacturers sustained to develop new products that were not only healthy but also offered greater convenience to consumers, and also helped to maintain robust growth in current value sales. Consumers are influenced in purchasing more healthy and natural products through the campaigns and regulations on health and wellness by the government, and also through the promotions of most companies in compliance to such regulations.

With GINGER-LEMONGRASS SYRUP, the product offers natural and organic quality that is beneficial to consumers in health and convenience for its versatility in various uses.

b. Population Growth

The growing population of Baguio City brings an advantage to the study since the demand is growing as well. With the percentage of demand growing, there is a greater opportunity for the Gingertwee Enterprise to commence on its operation.

c. Income Changes

The change of income share in Baguio City's population is a factor for demand. If there is an increase in income, the household's purchasing power increases as well. Once the ability to purchase rises, the demand for the product increases which can lead to an increase in the market price since raw materials and other supplies have also increased its value.

d. Advertisements

Through effective advertisements, the proponents decided to float flyers, and create a web page in social media. With the distribution of flyers in different public places in Baguio City and with the familiarity of a wider population in social media, there will be a more scope of interested customers for the product.

2. Factors affecting supply

The supply may be influenced by different factors which are the price of commodity or input cost, natural conditions, and technology.

a. The Price of Commodity or input cost

The cost of raw material, utilities, labor, licensing fees, and other expenses related to the production of Ginger Lemongrass Syrup are known as the input costs. As input cost increases, the ordered supply of the enterprise decreases which means Ginger Lemongrass Syrup production will also decrease.

The enterprise should have an alternative if the input cost increases and this alternative is having substitute ingredients which is cheaper but it does not affect the quality of the product. The enterprise should also reduce administrative costs which are the additional expenses set aside that would be made for the production.

b. Natural conditions

The production of the product could be affected by natural calamities like floods, typhoon, earthquake and etc. because the ginger being a rhizome grows underground in which it can be spoiled.

The proponents have come up to a solution in which the enterprise is prepared when natural calamities will occur and this is finding alternative suppliers.

c. Technology

The technology helps in many aspects as it makes our work much easier. The technological advancements affect supply through decreasing the production time and cost and increasing the production which means the product will be offered to the market on time without delay and sufficient for the customer to consume. The technology will help the stability of the supply and distribution of the products consumers.

The Gingertwee enterprise should consider the importance of technology. The enterprise must conduct cost analysis, whether they need advance equipment in order to attain the demand of the consumers. With the help of the available equipment the Gingertwee Enterprise can still produce a quality product at an affordable price.

G. Marketing Program

The marketing program allows the proponents to design set of activities that will help us achieve our marketing objectives. Through effective advertising, brand and logo design, sales calls, Web sites, brochures, packaging, conferences and other

events, the proponents will build customer commitment resulting to sustainable sources of revenue.

1. Product

GINGER-LEMONGRASS FLAVORED SYRUP is a natural sweetener and flavoring for both food and beverages. It mainly uses ginger and lemongrass as its main ingredient. With a new and great product, it will in effect attract the attention of consumers as potential buyers. The product consists of natural ingredients processed through safe and simple procedures. According to modern scientific research, ginger possesses a number of therapeutic properties such as anti-oxidant effects and direct anti-inflammatory effects, while lemongrass contains anti-microbial properties, and is rich sources of minerals like potassium, zinc, calcium, iron, manganese, copper, and magnesium. The packaging of the product will be in a plastic bottle since these are less expensive and more portable, plastic bottles are also recyclable materials. Nutritional facts, ingredients, and uses will also be included in the packaging to let consumers know its contents and health benefits.

Figure 2: The Product GINGER-LEMONGRASS FLAVORED SYRUP

2. Price

The demand and supply of any commodity in the market will be based on the effects of the product's price and quality. That is why having a new product, the proponents agreed to establish a price that is affordable to most consumers being worthy of its value and quality. The price of the product will be Php 60.00 for every 375mL.

3. Place

The location of the business will be in Baguio City since the proponents are students of SLU-Baguio and residents of the city. The proponents also believed that the city will be an ideal target market for the product, because of its potential demand and availability of raw materials for the product. The place of the

production site is located at Unit A, located in No.17 Bonifacio Street, A. Bonifacio-Caguioa-Rimando, Baguio City. The Gingertwee Enterprise will be distributing its product to different supermarkets, grocery stores, small independent (“sari-sari”) stores around Baguio City.

4. Promotion

To effectively advertise our product, GINGER-LEMONGRASS SYRUP, the proponents will conduct marketing strategies such as the distribution of leaflets in to different public places in Baguio; this will incur lesser cost for the enterprise. An official Facebook page in social media will also take part as a promotional strategy. Both leaflets and Facebook page will contain information about the logo, name, location, contact information and the official motto of the enterprise.

Figure 3: Sample Leaflet

CHAPTER III

TECHNICAL STUDY

Introduction

The technical study presents the business operation of the enterprise in a detailed manner. This chapter determines the startup capital that includes the raw materials, equipment, supplies and utilities, and the production schedule, production cost, project cost and labor requirement to facilitate its operation.

The proponents have assessed the availability of the resources needed and also the location of production of the product. There are different factors to consider on choosing the location which are social, economic and technological factors that may affect the marketability of the product.

A. The Product

Syrup is a condiment that is a thick, viscous liquid for cooking and mixed in the beverages. It is usually used as a flavoring agent for food. It consist of a solution of sugar in water, containing a large amount of dissolved sugars but showing little tendency to deposit crystals. The proponents thought of an additional flavor to add on a sweetener and came with various ingredients such as ginger and lemongrass. Thus, began the Ginger-Lemongrass syrup.

The *Ginger Lemongrass Syrup* is generally brown in color. The product taste sweet at its first taste and a little bit of spicy flavor that gives a menthol feeling in your throat because of the ingredient ginger. It is safe and healthy because it is made

naturally without using chemicals or preservatives. The main ingredients of the product are ginger and lemongrass that are very beneficial to our body because of the health benefits it has. The packaging material is a plastic bottle in which it can be recycled and it is 375ml.

B. Manufacturing Process

The enterprise will repeat the production process twice a day. In one production process, the enterprise can produce 50 bottles of 375ml Ginger Lemongrass Syrup.

Ingredients:

- Ginger (4.75kg)
- Lemongrass (2.7kg)
- Brown sugar (4.75kg)
- Water (2 liter)

1. The Preparation of Ingredients (15 minutes)

The ingredients will be prepared. In this process, it includes the rinsing of ginger and lemongrass, slicing the ginger into dice with the use of a knife and a chopping board, and cutting the lemongrass into strips using scissors. The preparation of other materials like the casserole, measuring cup and other materials in making the product are also included in this process.

2. Extraction of ginger and lemongrass (30 minutes)

After all the materials are prepared, put one liter of water into the large casserole and add 2.37 kilograms of diced ginger into the casserole. Heat the

mixture on the stove. Let it simmer for 20-30 minutes until the water is golden brown. This will be repeated five times due to the capacity of the casserole.

3. Mixing all of the ingredients (30 minutes).

After extracting the ginger and lemongrass juice, put the 2.37 kilograms of sugar into the casserole. Stir it with a spatula constantly until the brown sugar is fully dissolves. Continually stir the mixture and let it boil for about 5 minutes until the mixture thickens.

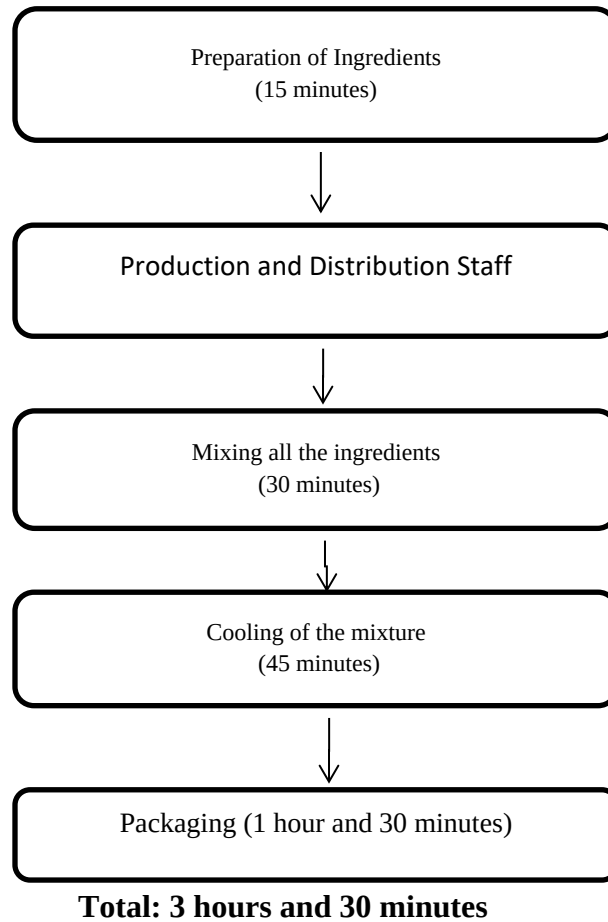

4. Cooling of the mixture (45 minutes)

Let the mixture sit for 45 minutes.

5. Packaging (1 hour and 30 minutes)

The proponents have decided to produce 45 pieces of 375ml bottle of Ginger Lemongrass Syrup per production. After cooling the mixture, use a funnel in transferring the mixture into the 375 ml bottle. In this process it will include putting the stickers of the product.

C. Production Flowchart

D. Plant Size and Production Schedule

The plant size is design to accommodate all the tools, supplies, equipment, and production area and storage room. It is located at Unit A, located in No.17 Bonifacio Street, A. Bonifacio-Caguioa-Rimando, Baguio, Benguet. The Gingertwee enterprise will rent a commercial space.

The enterprise will be open at 8:00 am and will be closed at 5:00pm. All laborers will have a lunch break from 12:00 noon to 1:00pm, a ten minute break in the morning and ten minutes cleaning time before 5:00 pm. The enterprise will operate all year round, except Sundays, and special or regular holidays. The

managing partners will regularly check all the facilities of the production site and the raw materials and inventories stored therein.

E. Machineries and Equipment

1. LPG Tank with Refill Brand Name: Petron Gasul Weight: 11kilograms Where to buy: Tionsan Harrison Cost per Unit: Php 2,080.00 No. of Unit/s: 2 Total Cost: Php 4,160.00	
2. Gas Stove Pressure Regulator Where to buy: Tionsan Harrison Cost per unit: Php 170.00 No. of unit/s: 1 Total cost: Php 170.00	
3. Propane Hose Where to buy: Tionsan Harrison Cost per unit: Php 170.00 No. of unit/s: 1 Total cost: Php 170.00	

4. Stove Brand name: 3D New Generation Where: SM Appliances Baguio Cost per unit: Php 1,499.75 No. of unit/s: 1 Total cost: Php1,499.75	
6. Heat Gun or Sealer ghg 600-3 Brand: Bosch Cost per unit: Php 1,000.00 No. of unit/s: 1 Where to buy: Tiongsan Total cost: Php 1,000	

F. Plant Location

The production site would be at No.17 Bonifacio Street, A. Bonifacio-Caguioa-Rimando, Baguio, Benguet. The renting expenses a month will be Php 15,000. The proponents decided this place as the enterprise's production area, since it is very near the Public Market and the delivery of the products will be convenient because most suppliers of syrups in the city are very near the production area as well.

Scissor	25.00	2	50.00
Marker	18.00	3	54.00
Wall Clock	150.00	1	150.00
Battery	140.00	1	140.00
Paper Clip	30.00	1	30.00

Total Cost of Office Supplies			Php1,657
-------------------------------	--	--	----------

Other Supplies

Items	Unit Cost	Quantity	Total
Fire Extinguisher	Php2,000.00	1	Php2,000.00
Total Other Supplies			Php2,000.00

K. Utilities

The Gingertwee Enterprise will need the availability of basic services such as water, electricity, gas and communication expense in its operation and production of Ginger-Lemongrass Syrup.

1. Water Consumption

The Baguio Water District will be the source of water supply. Water is necessary for washing the raw materials to be used, keeping the cleanliness of the production area, and for maintaining personal hygiene.

Water Consumption

Average Monthly Consumption	5
Price Per Cubic Meter	70.00
Monthly Water Consumption	350.00
Divide By: Number of Working Days	24
Total Water Consumption Daily	14.58

2. Electricity Consumption

Electricity is a significant form of energy for small and medium, and large-scale businesses. The enterprise will utilize electricity mainly for the lighting of the production area and for charging personal electronic gadgets.

Electricity Consumption

Items	Quantity	Hours Used	kwh	Commercial Rate	Total Consumption
Light Bulb	2	8	0.018	6.9063	Php1.9890
Cellphone Charger	1	1	1.00	6.9063	6.9063
Heat Gun	1	4.5	0.002	6.9063	0.0621
Total Electric Consumption Daily					Php8.96

3. Liquid Petroleum Gas (LPG)

The proponents will be purchasing 11 kg of LPG Tank worth P2,080.00 each which will be consumed for a month of operation. The average price price for refilling the LPG Tank will be P580.00 Tank a month.

Liquid Petroleum Gas (LPG) Expense

Gas Refill	Php580.00
Quantity	1
Total LPG Expense	580.00
Divide by: Number of Working Days	24
Total LPG Expense Daily	Php24.1666667

L.Waste Disposal

The enterprise will be applying its Corporate Social Responsibilities through its Proper Waste Management System. The system will be having more of its waste segregation, having both biodegradable and non-biodegradable trash bins in the production area. The proponents will be mindful of disposing wastes properly in an area along the way of Bonifacio Street as mandated by the Administration of Wastes for garbage collection, and will also note on the scheduled days of collection in the area.

M. Labor Requirements

For the enterprise to perform efficiently with their operation, the proponents would need at least two (2) employees who will be receiving trainings to take responsibilities over the purchase of raw materials, the production process of the enterprise and the delivery of the finished products. The employees will be purchasing raw materials, processing these raw materials, producing about 90 bottles of syrup twice a month, and after which, delivering the products to the suppliers of syrup in the city. From washing and cleaning the raw materials, manually peeling and chopping the ingredients, checking the correct boiling temperature of sugar syrup, adding the main ingredients, measuring and packaging the final product, and maintaining proper waste management in the area will be under the responsibilities of the employees on its production process. As for a

starter in business, the daily wage will be Php 285.00 since it is the current minimum wage here in Baguio City. Upon acceptance for the job, the two (2) employees shall receive this benefit including SSS, Philhealth, PAGIBIG and 13th month pay.

Operations will start at 8 A.M. and will end at 5 P.M., for a total of 8 working hours for the employees. They are required to be early in the production building and start working at the exact starting time of work. The employees will be given a 15-minute break in the morning (10:00-10:15 A.M.), an hour lunch break (12:00noon-1:00pm), and another 15-minute break in the afternoon. The days of work will only be Mondays until Saturdays only. Constituting factors such as responsibility and honesty towards work will allow employees to secure their jobs and establish the enterprise's trust and confidence on their job performances.

N. Production Cost

Particulars	Note	Amount
Raw Materials	1	Php1,369.00
Direct Labor	2	677.98
Factory Overhead	3	2,533.70
Total		Php4,580.68
Divide by: Bottle produced		100
Cost Per Unit		45.81
Add: Mark-up (30%)		13.743
Selling Price per bottle		Php59.55

Note1: Raw Materials

Items	Unit Cost	Quantity	Total
Ginger	Php200.00/kg	4.75kg	Php950.00
Lemongrass	60.00/kg	2.70kg	162.00
Brown Sugar	40.00/kg	4.75kg	190.00
Total Raw Materials			Php1,302.00
Freight Cost of Ginger and Lemongrass			67.00
Total Cost of Raw Materials Daily			Php1,369.00

Note2: Direct Labor

Minimum Wage (Php285*2)	Php570.00
Multiply by: Number of working days	24
Total Monthly Salaries	13,680.00
Add: Benefits of Employees	
SSS(Php525.70*2)	1,501.40
Philhealth(Php100.00*2)	200.00
PAGIBIG(Php100.00*2)	200.00
13 th Month Pay(Php6,840.00*2)/12	1,140.00

CHAPTER IV

FINANCIAL STUDY

Introduction

The Financial Study of the business determines whether the project is viable in meeting its long-term and short-term obligations, as well as whether the enterprise will be profitable even with existing competition and present detailed figures to show the improvement of the project's financial condition over time. This Chapter includes the major assumptions, schedules and notes for the financial statements in next five years of operation of the enterprise.

A. Major Assumptions

1. Annual Production Days

The operation of the business will start on January 1, 2017. For the first year, the enterprise will operate for 288 days. The production will be eight (8) hours a day from 8 A.M. to 5 P.M. The total of workdays in a year will be 288 days in

which holidays and Sundays are excluded. The 288 days will be constant for the next four years of operation of the enterprise.

2. Production

It is expected that the enterprise will produce 100 bottles per day having a total of 28,800 bottles for the first year. The production of the enterprise will increase by 8% every year.

3. Sales

The sales would be on consignment basis. The delivery of the product will be on a monthly basis. The receivable from the consignee would be the last week of the year delivery.

4. Selling Price

The product will be sold for Php70.00 per bottle inclusive of a 75% markup on the first year. The selling price will increase by 5% every year due to inflation and will be round off into the nearest centavo.

5. Raw Materials

The raw materials needed for the production will be purchased monthly and paid through cash. The proponents will assume a 8% increase annually due to increase in production quantity.

6. Packaging Supplies

The packaging supplies of the enterprise would increase by 8% annually.

7. Supplies

The enterprise will consider a 2% increase for the price of different supplies such as for the office supplies, cleaning supplies, and production supplies.

8. Rent Expense

The rent expense is constant since it is has been agreed between the partners and the owner of the commercial space.

9. Delivery Expense

The delivery expense is assumed Php 2,400.00 monthly not subject to yearly changes since fare does not increase yearly.

10. Advertising Expense

The advertising expense in the first year is Php1,000.00 while the next four years will be decreased by 8%.

11. Utilities Expense

Cost of utilities will not be subjected to changes for the succeeding 5 years.

12. Depreciation

The Straight Line Method of Depreciation will be used for computing the depreciation of all depreciable assets. The estimated useful life will be five (5) years.

13. Partner's Contribution

Each member will contribute Php 50,000 for the start-up capital of the enterprise. There will be an equal distribution, among the partners, of both profits and losses incurred.

14. Withdrawals

Each partner is allowed to withdraw up to 30% in the share of their net income.

15. Salaries Expense

The enterprise will provide the minimum wage of Php 285.00 per employees, as well as SSS, Philhealth, and Pag-ibig benefits.

16. Bonus

A bonus equal to an employee's one-month salary will be given as a 13th month pay.

17. Inventory, ending

The product for the last day of production will be a part of the ending inventory as assumed to be delivered but not yet sold.

THE GINGERTWEE ENTERPRISE

Projected Income Statement

For the Years Ended December 31, 2017-2021

Divide by: Current Liabilities	91,585.11	105,720.59	119,833.49	136,980.53	156,230.58
Current Ratio	<u>5.18</u>	<u>6.29</u>	<u>7.91</u>	<u>8.65</u>	<u>10.89</u>

Current ratio measures the ability of the firm to meet to its obligation. This table shows that every 1.00 of the current liability the enterprise can pay 5.18 current assets in 2017. It follows also in the succeeding years.

II. Acid Test Ratio or Quick Ratio

	2017	2018	2019	2020	2021
Current Assets	420,012.11	710,964.23	1,078,579.50	1,558,289.77	2,170,903.70
Less: Inventory	4,581.00	5,095.90	5,668.68	6,305.84	7,014.62
Divide by: Current liabilities	96,156.81	110,292.29	124,405.19	141,552.23	160,802.28
Acid Test Ratio	<u>4.32</u>	<u>6.40</u>	<u>8.62</u>	<u>10.96</u>	<u>13.46</u>

Acid Test Ratio or Quick Ratio measures the ability of a company to use its near cash or quick assets to extinguish or retire its current liabilities immediately. The increasing acid test ratio shows that the quick assets are very sufficient to meet any currently maturing obligations. In 2017, 4.32 acid test ratios mean that for every one peso liability that enterprise has Php 4.32 to finance it.

B. Solvency Ratios

I. Debt-Equity Ratio

	2017	2018	2019	2020	2021
Total Liabilities	96,156.81	110,292.29	124,405.19	141,552.23	160,802.28
Divide by: Partner's Equity	373,160.29	612,598.41	944,240.77	1,387,910.44	1,957,347.13
Debt equity Ratio	<u>0.26</u>	<u>0.18</u>	<u>0.13</u>	<u>0.10</u>	<u>0.08</u>

The table shows the computation of debt to equity ratio that will arrive at 0.26 for the year 2017, 0.18 for 2018, 0.13 for 2019, 0.10 for 2020 and lastly 0.08 for 2021. These ratios are below the industry average of 1.00, and this indicates that the enterprise tends to finance growth and utilizes more equity than debt.

II. Debt- Asset Ratios

	2017	2018	2019	2020	2021
Total Liabilities	96,156.81	110,292.29	124,405.19	141,552.23	160,802.28
Divide by: Total Asset	<u>469,317.10</u>	<u>722,890.70</u>	<u>1,068,645.95</u>	<u>1,529,462.66</u>	<u>2,181,447.50</u>
Debt Asset ratio	<u>0.20</u>	<u>0.15</u>	<u>0.12</u>	<u>0.09</u>	<u>0.07</u>

Debt to Asset ratios assesses the relative share of creditors over the total resources of the firm. It means that the increase in total liabilities and total assets are not the same although, percentage only entails that the total assets are able to comply with debts of the enterprise. The debt to assets of the enterprise is as follows: 0.20 for 2017, 0.15 for 2018, 0.12 for 2019, .009 for 2020, and 0.07 for 2021.

C. Profitability Ratios

I. Gross Profit Margin

	2017	2018	2019	2020	2021
Gross profit	256,932.74	431,970.95	620,159.13	848,803.61	1,105,489.30
Divide by: Net Sales	2,009,000.00	2,278,206.00	2,583,485.60	2,929,672.67	3,322,248.81
Gross Profit Margin	<u>0.13</u>	<u>0.19</u>	<u>0.24</u>	<u>0.29</u>	<u>0.33</u>

The table shows that for every peso sale there is 0.13 excess of the income from sale over the cost cover the normal operating expenses excluding financing. This means that for every year there is a profit contribution for the enterprise's business activities and increase in expected percentage contribution to the enterprise future profitability.

II. Return on Sales (ROS)

	2017	2018	2019	2020	2021
Net Income	167,454.10	299,385.25	431,105.60	591,144.62	770,811.78
Divide by: Net Sales	2,009,000.00	2,278,206.00	2,583,485.60	2,929,672.67	3,322,248.81
Return on Sales	<u>0.08</u>	<u>0.13</u>	<u>0.17</u>	<u>0.20</u>	<u>0.23</u>

This table shows that for every 1 peso increase of net sales that the enterprise generates, cost of sales and gross profit amounts to .08, 0.13, 0.17, 0.20, and 0.23 respectively. This shows that the amount of net income per peso sales of profitability based on sale.

CHAPTER V

SOCIO-ECONOMIC STUDY

INTRODUCTION

Economically and socially, establishing a business will be beneficial for consumers, producers, and both employers and employees. Creating a business will also create opportunities in jobs, generate profit for its owners and increase demand which provides growth for the economy. The government shall also take part of its benefits since, a business entity abiding to the law, contributes to taxes. The goal of the proponents will not only be on gaining profit but shall administer the contribution of the enterprise to the economy and society. This chapter will show how the enterprise affects the factors of economy and the standard of living in the society.

A. Employment and Income

Employment rate increases for every new business established. Given that people are willing and qualified for the jobs offered, they can earn income by working for the enterprise. Standard of living will improve and constantly be improving after applying for the job offered by the enterprise and maintain the said job for possible salary increase. The employees will be compensated based on their job performances.

B. Taxes

Taxes are vital for the government, these are used for improvements in public structures, utilities, and other public responsibilities for the benefit of the society. Businesses are required to contribute taxes to conform to the legal requirements in order for every enterprise to start and continue its operation. Through paying taxes, the enterprise also plays an important role in the contribution for the betterment of the society.

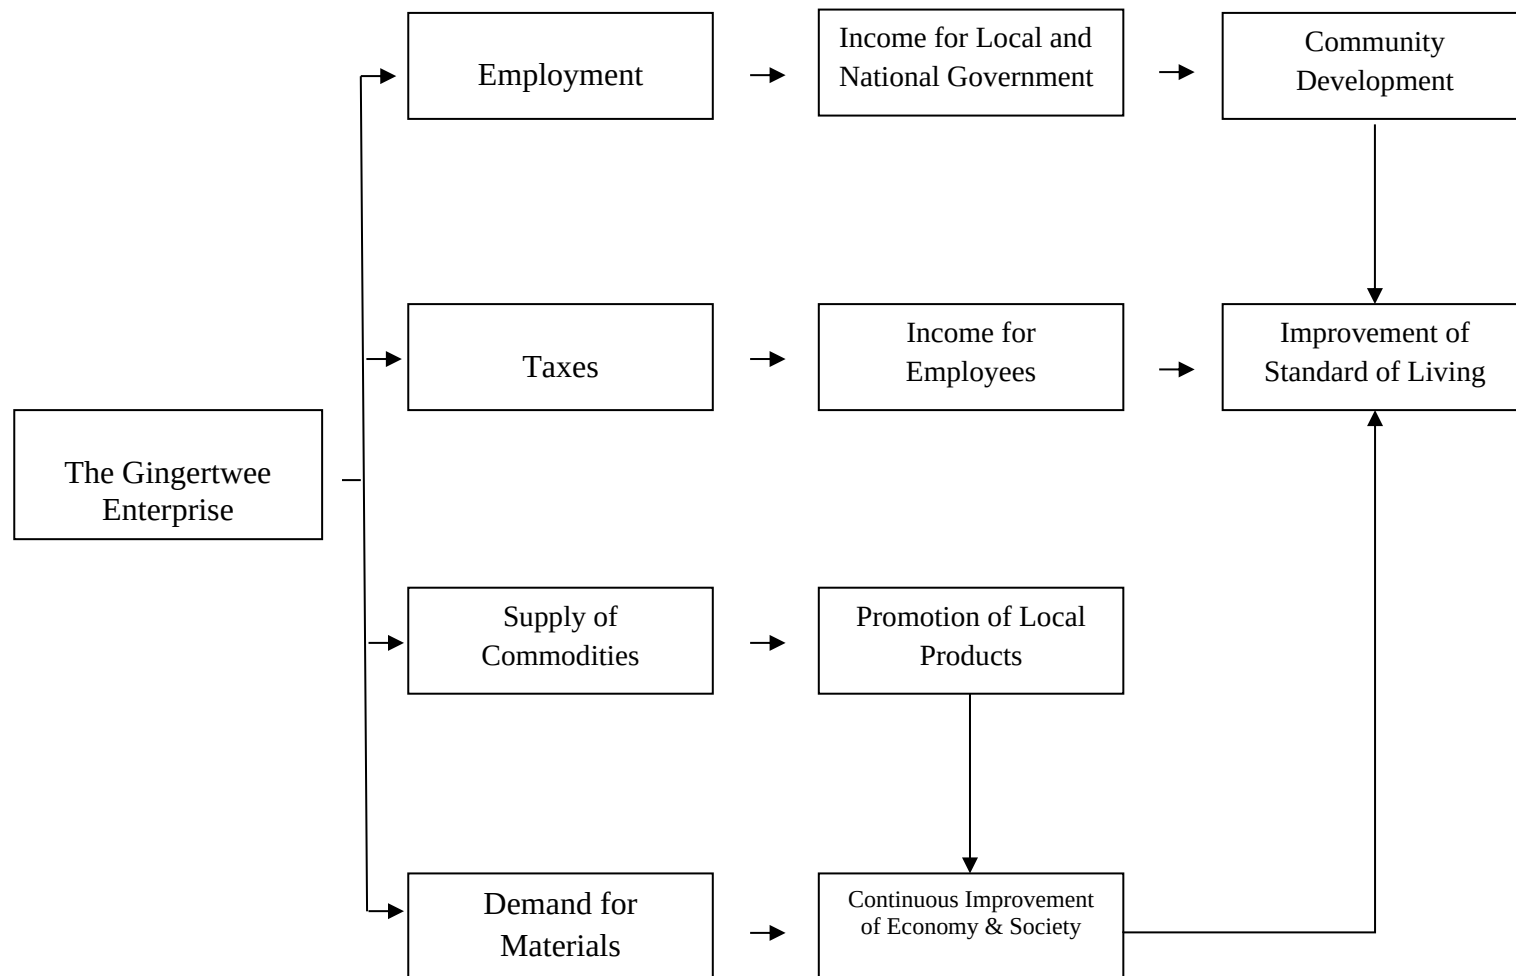

C. Supply of Commodities

The resources needed by the enterprise are mostly provided by the public market near the production area. Local suppliers of goods may have an increase in sales and income generation. Factors may affect the prices of the raw materials needed for production, and as such may be the happening of natural calamities, and the unpredictable change of weather. These factors cannot be controlled, and therefore, the proponents will be attentive in such cases.

D. Demand for Materials

The enterprise will need agricultural products such as ginger, lemongrass, and sugar for the main product, the “Ginger Lemongrass Syrup”. The production of the main product creates demand and affects the supply for these raw materials which would allow more public market vendors to sell and more buyers to purchase. And also, as a result from increasing the suppliers’ income, it will result to increased tax revenue for the government.

E. Socio and Economic Factors Affected

CHAPTER VI

Organizational and Management Study

This chapter includes the organizational structure and managerial structure of the enterprise. It also covers the implementation of the project proposed by the proponents. This study will determine how the business will operate and who are the persons involved in keeping the business in schedule. In this chapter the proponents discussed the basic consideration, the form of ownership, the organizational chart, the officers of the enterprise and other key personnel, and lastly the general employment regulations of the business.

A. BASIC CONSIDERATION

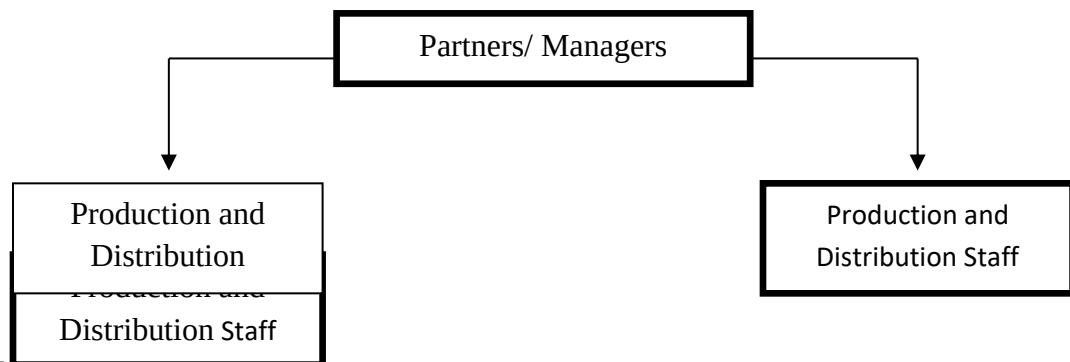

In order for a business to be successful the management and administration must be well organized and systematic. One of the factors that should also be considered is the hiring of qualified and skilled employees. The capabilities and skills of the employees must match the job description of given by the partners. Proper and good labor force could be one of the competitive advantages of the enterprise because it will help the enterprise to have production efficiency. The mission and vision of the enterprise must be inculcated with the employees in order to meet the vision and mission of the enterprise.

B. FORM OF OWNERSHIP

The form of ownership of the enterprise will be partnership, particularly General partnership, with two (2) partners namely, Marla Gail Rodrigo and Stephanie Sierra. They will be contributing equal share for the initial capital of the business and agreed to divide

profits and losses equally. The partnership liabilities will be also divided equally to both general partners and they will be liable to the extent of their personal properties. Both general partners will be in charge of the management of the business and they will act according to their partnership agreement. In case of expansion of the business or for other purpose, the partners agreed to contribute more capital for such purpose.

C. ORGANIZATIONAL CHART

D. Officers and Key Personnel

The employees/ workers of the enterprise will be hired based on the criteria and qualifications set by the management their functions, qualifications, and requirements are as follows:

1. Manager or Partners

The Managers are responsible for the overall operations and production of the enterprise. They are also responsible for the creation and implementation of procedure and policies as well as maintaining an ethical work environment of the enterprise. They will also be in charge with the capital formation, finances and processing of legal documents necessary for the business. They will also be responsible for formulating plans, decisions,

and strategies for the growth and development of the business. They are also responsible for hiring employees and negotiating with the clients.

2. Production and Distribution staff

Two (2) are in charge of the production and distributions of the business' products. One part of their works is to make sure the cleanliness and orderliness of the workplace is maintained.

Job description:

1. Helps in the preparation and production of the product particularly Ginger-lemongrass syrup.
2. Reports the inefficiency of equipment used in the manufacturing area.
3. Deliver the products from the production site to different stores or to the consignee.
4. monitors the raw materials usage and spoilage
5. Responsible for cleanliness and sanitation of the production site.
6. to manufacture product with good quality

Job Qualifications:

1. at least High School Graduate
2. 18-25 years old
3. male or female
4. hardworking and trustworthy
5. can work under pressure
6. with good moral character

7. has good communication skills
8. with knowledge of safety, sanitation, and food handling procedures
9. can work on their own and in groups

Job Requirements:

- A. Resume / Bio-data with 2x2 picture
- B. application letter
- C. Birth certificate
- D. Medical certificate
- E. Police and NBI Clearance
- F. SSS, Phil Health, PAG-IBIG
- G. Diploma

E. General Employment Regulations

This guidelines aims to simplify particular process according to the set of rules and regulations on operations, practices, and routines of employees that will surely be implemented.

1. Working hours

Employees will work Monday to Friday from 8:00am to 5:00pm. Exceptions may arise for emergency purposes and holidays.

2. Tardiness and under time

Employees should be punctual on coming to work. An employee will be considered late if he or she arrives beyond 15 minutes from the set of business time and under time if he leaves 15 minutes before the closing time. Memo of tardiness or under time will be given to employees and corresponding disciplinary actions or salary deduction will be implemented.

3. Time keeping

The employees must accomplish the Daily Time Record to monitor their attendance.

4. Absences

Each employees will surely be monitored every day for their works especially their absences during their duty. Absences during their working shifts without notifying their managers will be recorded as absent without leave and neither pays.

5. Day offs

Every Sunday will be given to the employees as their day-off in order for them to have a rest day.

8. Breaks

Employees will be having a one hour lunch break and 10 minute break in the morning. all personnel must eat their meals and take break in areas designated by the management. Employees are prohibited to smoke, drink and eat while working.

9. Overtime

Gingertwee Enterprise compensates employees for overtime in accordance with the Labor Code of the Philippines and the enterprise will follow the 25% of their daily wage as additional compensation for every hour.

10. Compensation and Benefits

a. Salaries and wages

An employee will receive their payment twice a month, on every 15th day and 30th day. Insurance and other payables and deductions like SSS, withholding tax, PhilHealth, and PAG-IBIG Fund will be deducted in their gross salary for their pay.

b. Holiday pay

Regular and Special Holiday will be followed by the enterprise. Every employee will be having their holiday pay.

c. 13th Month Pay

Regular employees shall receive 13th month pay equivalent to their regular monthly salary.

d. Sick leave

Service incentive leave (SIL) may be used as sick leave for every employee. It is only applicable to the employees who have been working or rendering his/her service for not less than one (1) year.

11. SSS and PhilHealth Benefits

Certain deductions will be applied to the employee's salary to pay for their SSS and PhilHealth to avail services and benefits given by the government.

12. Resignation

In case an employee intends to resign, he/ she must give a one-month prior notice to the management and must comply with all the clearance requirements; otherwise the employee shall forfeit whatever remaining compensation due to him/her.

13. Termination

In cases involving termination of an employee's service from the enterprise, appropriate notice of termination shall be furnished to the employee subject to clearances of all accountabilities. As a matter of policy, terminated employees are not qualified for reinstatement.

APPENDICES

Department of Financial Management
School of Accountancy and Business Management
Saint Louis University

Dear Respondents,

We, the 3rd year Financial Management students of Saint Louis University, are conducting a study on GINGER-LEMONGRASS SYRUP in partial fulfillment of the course Feasibility Study(FinMan 9c) .

In this connection, may ask for your response on our questionnaire. Rest assured that information gathered will be used for academic purposes only. Your participation is highly appreciated.

Thank you and God bless!

Respectfully yours,

Rodrigo, Marla Gail A.

Sierra, Stephanie D.

Noted by:

Gerry O. Gatawa, MBA
Adviser

Name: (optional)_____

Age:_____

1. Do you use syrup (e.g. maple, corn, etc.)? (If no proceed to question number 4)

___ YES

___ NO

2. In relation to your answer in No. 1, what size do you usually buy and how many do you buy?
(kindly check the size and encircle the quantity)

Sizes	Quantity
___ 250 mL	1 2 3 4
___ 375 mL	1 2 3 4
___ 500 mL	1 2 3 4
___ 540 mL	1 2 3 4
___ 750 mL	1 2 3 4
___ others (please specify _____)	

3. In connection in No. 2, how long do you usually consume?

___ one week

___ two weeks

___ three weeks

___ one month

___ others (please specify _____)

4. If we are going to sell a GINGER- LEMONGRASS SYRUP, are you willing to buy?

___ YES

___ NO

Historical Value of Demand

ARTICLES OF PARTNERSHIP
OF
THE GINGERTWEE ENTERPRISE

KNOW ALL MEN BY THESE PRESENTS:

That we, the undersigned partners, all of legal age, residents and citizens of the Philippines, have on this day voluntarily associated ourselves together for the purpose of forming a general partnership under the following terms and conditions and subject to existing and applicable laws of the Republic of the Philippines:

AND WE HEREBY CERTIFY:

ARTICLE I. That the name of this partnership shall be:

THE GINGERTWEE ENTERPRISE

and shall transact business under the said company name.

ARTICLE II. That the principal place of business of this partnership shall be located at : Unit A, located in No.17 Bonifacio Street, A. Bonifacio-Caguioa-Rimando, Baguio, Benguet.

ARTICLE III. That the names, nationalities and complete residence addresses of the partners are as follows:

<u>Name</u>	<u>Nationality</u>	<u>Residence Address</u>
Marla Gail A. Rodrigo	Filipino	Baguio City, Benguet
Stephanie D. Sierra	Filipino	Urdaneta City, Pangasinan

ARTICLE IV. That this partnership shall have a term of 10 years from and after the original recording of its Articles of Partnership by the Securities and Exchange Commission.

ARTICLE V. That the purpose/s for which this partnership is formed is/are:

To engage in business related to natural and healthy sweeteners to the people of Baguio City.

ARTICLE VI. That the capital of this Partnership shall be the amount of TWO HUNDRED TEN THOUSAND PESOS (P210,000.00), Philippine Currency, contributed in cash by the partners, as follows:

<u>Name</u>	<u>Amount Contributed</u>
Marla Gail A. Rodrigo	105,000.00
Stephanie D. Sierra	105,000.00

That no transfer of interest which will reduce the ownership of Filipino citizens to less than the required percentage of capital as provided by existing laws shall be allowed or permitted to be recorded in the proper books of the partnership.

ARTICLE VII. That the profits and losses of this partnership shall be divided and distributed proportionately on the ratio of the capital contribution of each partner.

ARTICLE IX. That this partnership shall be under Marla Gail A. Rodrigo and Stephanie D. Sierra, as General Managers, who shall be in charge of the management of the affairs of the company. They shall have the power to use the partnership name and in otherwise performing such acts as are necessary and expedient in the management of the firm and to carry out its lawful purposes.

ARTICLE X. That the partners undertake to change the name of this partnership, as herein provided or as amended thereafter, immediately upon receipt of notice or directive from the Securities and Exchange Commission that another corporation, partnership or person has acquired a prior right to the use of that name or that the name has been declared as misleading, deceptive, confusingly similar to a registered name, or contrary to public morals, good customs or public policy.

IN WITNESS WHEREOF, we have hereunto affixed our signatures this 13th day of November, 2016, at Baguio City, Benguet, Philippines.

Marla Gail A. Rodrigo

	SIGNATURE OVER PRINTED NAME	SIGNATURE OVER PRINTED NAME
	DATE & TIME	DATE & TIME

INSTRUCTIONS

1. Fill out this form in two (2) copies and accomplish appropriate parts as follows:
For Business Employer - Part I-A
For Household Employer of family driver/s - Part I-B
2. In filling out the box for Tax Identification Number (TIN) in Part I-A of the form, please fill out as follows:
 - Business TIN, if business employer
 - Personal TIN, if household employer
3. For the "Start of Operation" and "Number of Employees" boxes, fill out the required data, as follows:
 - Start of Operation - exact date of start of business operation/date of employment of family driver
 - Number of Employees - actual number of employees upon registration with SSS, if any
4. Always indicate "N/A" or "Not Applicable", if the required data is not applicable.
5. Always affix initials on all erasures/alterations on this form.
6. Present valid identification cards/documents. Refer to attached "List of Filer's Valid Identification (ID) Cards/Documents".
7. Write the Employer ID Number and Employer Name in all pages of all identification cards/documents.
8. Submit this form to the nearest SSS branch office with the supporting documents. Refer to the attached List of Documentary Requirements.
9. This form shall be signed by the following authorized signatories:

9.1 For Business Employer

9.2 For Household Employer of Family Driver/s

LEGAL PERSONALITY	AUTHORIZED SIGNATORY	SUPPORTING DOCUMENT/S
A. Single Proprietorship	- Owner or, in his/her absence, any representative with valid Special Power of Attorney (SPA)	Any of the following: 1. Certificate of Registration of Business Name from the Department of Trade and Industry (DTI) 2. Business Permit from the Municipal Office
B. Partnership	- Managing Partner	Approved Articles of Partnership from Incorporation from Securities and Exchange Commission (SEC)
C. Corporation Including non-stock/non-profit corporations	- President, Chairman or Corporate Secretary	Approved Articles of Incorporation from SEC
Foreign-owned corporation	- The designated Philippine representative as shown in the SEC registration	1. Approved Articles of Incorporation from SEC; and 2. License to Transact Business in the Philippines from SEC
Manning agency with foreign principal	- President, Chairman or Corporate Secretary	1. Approved Articles of Incorporation from SEC; and 2. Agency Agreement between the manning agency and foreign principal
D. Cooperative	- Chairman or Corporate Secretary	Approved Articles of Cooperation from the Cooperative Development Authority (CDA)
Manpower service cooperative	- Chairman or Corporate Secretary	1. Approved Articles of Cooperation from CDA; and 2. Accreditation from the Department of Labor and Employment (DOLE)

10. Report all your employees for SS coverage within thirty (30) days from the date of their employment by submitting an accomplished "Employment Report" (SS Form R-1A) to the nearest SSS branch office. Please be reminded that failure to report your employee/s within the prescribed period shall render you liable for damages equivalent to the benefits to which said employee/s would have been entitled in case of any contingency had the employee/s been reported on time. (Sec. 24 of R.A. 8282).
11. Separation of your employee/s should be reported by submitting an accomplished "Employment Report" form.

REMINDERS

1. Always use your correct Employer Number in all your transactions with SSS.
2. Notify the nearest SSS branch office using the "Employer Data Change Request" (SS Form R-8) to update your data/records with the SSS. This will expedite your transactions with SSS and avoid the possibility of being billed of unpaid contributions in case of temporary suspension or cessation of business operation.
4. Verification of status may be made thru the SSS website at www.sss.gov.ph or contact our Call Center at 920-6446 up to 55 or 917-7777.
