ACKNOWLEDGMENTS

Extending our sincere thanks to Ms. Nathalie Bermudez for her guidance in our feasibility study, and her priceless suggestions without which we could never complete our study.

We also want to extend our thanks to our parent's help, understanding and especially for financial support.

We finished our study by the help of my dear classmates, our adviser, our parents, ourselves and of course, by the help of our Beloved Almighty Father.

INTRODUCTION

The paper is to present a proposal for a master's thesis which seeks to conduct a feasibility study for a fast-food selling Tokneneng, Fries, Spicy green mango, and Iced Tea in St. Thomas More Montessori School, Doctolero Ave. Tagum City.

The Filipinos have a very passionate relationship with food. While the Philippines is considered a developing country, Filipinos find ways to still enjoy food without costing an arm and a leg. If you are ever visiting the country, the best way to understand the Filipino food culture is by looking to the streets. Since Filipinos have a constant love affair with food, it is impossible to die of hunger in the Philippines. Street food vendors can be found practically everywhere – outside school, beside the church, at the street corners, inside jeepney or bus terminals, etc. They are popular to people from all walks of life – but especially to the one who has to keep a tight budget. Street food is extremely expensive. It's a great experience to try out cheap and delicious Filipino food. Being low cost and convenient, street foods are preferred by almost 2.5 billion people in the world to satisfy hunger (FAQ, 2017).

A variety of street foods are what we are in cognizance. For this brand perception that we formalize we would like to linger the interest of the buyers and also the consumer with our version of street food. We would like to introduce our different kinds of foods that would like to propose: Tokneneng, Fries, Spicy green mango, and Iced Tea. Tacio (2012) stated that it is an integral part of the landscape and culture of Filipinos. They are known to enjoy the average three meals a day.

2.0 Executive Summary

2.1 Highlights

2.1.1 Project Background

Meet N' Eat is the name of our business project and the type of business that we are going to run is partnership. This so called business is located in St. Thomas More Montessori School. Grade 12 students of ABM strand will be the one who will run the proposed business.

2.1.2 Management and Personnel Feasibility Study

The Meet N' Eat business consists of four personnel and these are: 1. General Manager, 2. Accounting Manager, 3. Human Resource Manager, and 4. Sales Manager. These managers have a business degree under their course and have a lot of experience with their job.

2.1.3 Marketing Feasibility Study

The scope of our market will be inside the St, Thomas More Montessori School. The amount of the product that we will be going to produce depends on the demand of the students. Our supply will be 70% of the population since most of the students have doubled their wants and there are students who will just buy according to their preference. Therefore, we estimated it to 70% only since we conclude that the 30% will be normal buyers only. In this part also discuss the target market of our product and this is the STMMS students together with their

demographic profile. It also includes the marketing research and development program. Under this is the product-mix strategies; the width, depth, and consistency, the market timing and scheduling strategies; rapid skimming, growth stage, maturity stage, decline stage. We also have pricing strategies like how we base the price of our products. Our sales strategies is giving discounts and allowances to customers, also the packaging strategies on how we name our product and label it and the advertising strategies on how we promote our product to our scope of limitation. In this are includes also our projected sales of our products, the price, cost, quantity, unit, and serving. And lastly, the sensitivity analysis of how much sales we will achieved in 5 years of continuous selling.

2.1.4 Production or Technical Feasibility Study

We will offer four products in our business. We will be having fries, tokeneng, green mango and Nestea. This product may not be new to the customers' but we will make the satisfaction by giving and providing correct service. Our business is located in Doctolero, Avenue in St. Thomas More Montessori School.

2.1.5 Financing and Financial Feasibility Study

The project cost and financiers is 601,000 where the debt is 183,000, while the equity is 418,000. And it makes a total of 100% contribution. In this area, Balance sheet and Cash flow of the proposed business were stated.

2.1.6 Socio-economic Feasibility Study

For every year we have the projected salaries of Php 150,000. We have 13th month pay of Php 12,500 with some benefits like SSS and PhilHealth. The proposed project aims to help our localities near our location. Now a days it is important that small entrepreneurs should realize the worth innovating and starting a business that would largely contribute to the socio-economic development.

2.2 Conclusions to Feasibility Study

The proposed project is in higher rate demand because of the lack of variety of food that the canteen offers. Together with targeting the students' wants. And the estimated quantity of the products with generally accepted price. The proposed project will supply the student's demand in order for them to satisfy their needs and wants, thus creating a relationship to our customers. Our business is feasible because it is easy to establish and is profitable with quality products. Our proposed business venture and marketing potential were assessed. This makes business idea to be profitable

3.0 PROJECT BACKGROUND

3.1 Project Proponents

Name	Nationality	Address	% Ownership	Type of Partnership
Jesreel Rave Aurelio	Filipino	Delfina, Tagum City	25%	General
Bethojim Dacaldacal	Filipino	La Filipina, Tagum City	25%	General
Patricia C. Enolpe	Filipino	Rupinta 2, Tagum City	25%	General
Idan Jevon Entize	Filipino	Mabini, De Oro	25%	General

Table 1 Project Proponents

3.2 Proposed Name of the Business

Meet 'n' Eat- Meet 'n' Eat where people can go and eat together. Perfect for lovers, your *barkadas* and also date with yourself. Meet 'n' Eat serves different delicious and limited kinds of food, these are: Fries, Tokneneng, Green Mango and for our drink we serve homemade Nestea.

3.3 Types of Business Organization

Partnership- Four heads are better than one. We choose business partnership as a type of business, aside from we only have few members that are available is that, partnership is easy to establish and the costs are low to start-up unlike corporation businesses.

3.4 Location

St. Thomas More Montessori School, Doctolero Ave., Tagum City- This serves as our chosen place because STMMS premises are clean and environmentally friendly. When place is clean then the ambiance will become suiting to the customers and as well

as the sellers. STMMS has also the ideal population to meet the amounts of products that we will sell so that no scarcity will arise.

4.0 MANAGEMENT & PERSONNEL FEASIBILITY

4.1 PERSONNEL

➤ There will be a group of 4 Personnel. Consisting of General Manager, Accounting Manager, Human Resource Manager, & Sales Manager.

PROPOSED ORGANIZATIONAL CHART

Figure 1 Proposed Organizational Chart

Administrative Personnel's Job Requirements, Specifications, Responsibilities, and Function.

General Manager

Job Requirements:

- Degree in Business Management or Masters in Business Administration.
- Good Knowledge of different business functions.
- Strong leadership qualities.
- Excellent communication skills.
- Highly organized.
- Strong work ethic.
- Good interpersonal skills.
- Meticulous attention to detail.

- Retirement plan including company contribution/matching
- Tuition or student loan contribution
- Salary increase
- 13th month pay
- Personal Leave
- Pension Plans (SSS and Philhealth)
- Training
- Educational Assistance Program
- Service Awards

4.2 MANAGEMENT PROPOSALS

The management style that we will going to use is the theory X. Managers emphasize the chain of command, reward or punishment motivational techniques along with the close supervision of subordinate behaviour. Employees must be coerced, controlled, directed and threatened with punishment to get them to work. If employee fails to follow the rules and regulation of the company, he/she may receive the following punishments:

- 1st offense- Written reprimand.
- 2nd offense- 3 days suspension.
- 3rd offense- 7 days suspension.
- 4th offense- 5% deduction to salary.
- 5th offense- Dismissal

Employee should not do the following:

- Late-coming to work
- Failure to wear uniform at work place
- Abuse of Company's property
- Failure to properly serve the food to the customer
- Using vulgar words in the workplace
- (AWOL) Absence from duty without leaves for period of less than six days

General Company Policies

Company policies and procedures establish the rules of conduct within an organization, outlining the responsibilities of both employees and employers.

The following is a list of behaviour that our company considers unacceptable:

- Refusing or failing to carry out any instructions of a supervisor.
- Leaving your work station without permission from your supervisor.
- Failure to be at the work place, ready to work, at the regular starting time.
- Ignoring work duties or loafing during working hours.
- Being tardy or taking unexcused absences from work.
- Failing to wear clothing conforming to standards set by the company.
- Fighting or engaging in horseplay or disorderly conduct.
- Intentionally giving any false or misleading information to obtain employment or a leave of absence.
- Not taking proper care of, neglecting, or abusing company equipment and tools.
- Wilfully damaging, destroying, or stealing property belonging to fellow employees or the company.

- Coming to work under the influence of alcohol or any drug, or bringing alcohol beverages or drugs onto company property.
- Punching another employee's time card or falsifying any record.
- Smoking contrary to established policy or violating any other fire protection regulation.
- Wilfully or habitually violating safety or health regulations.
- Possessing firearms or weapons of any kind of company property.
- Using threatening or abusive language toward a fellow employee.

Administrative Department

The Human Resource Department handles vital functions within the business. It is where the provision and happenings for labour law compliance, record keeping, hiring and training, compensation, relational assistance and giving help with the specific performance issues.

The Sales Department direct the connection between the product of the company and the future customers. Also, it is where the staffs build relationship with customers.

The Accounting Department will be responsible for the recordings and reporting the cash flow transactions within the company. These are accounts receivable, accounts payable, payroll, financial reporting, and maintaining financial controls.

The Administration and Legal department will be responsible for overall budgeting, planning, managing resources, and also for facilitating general work flow processes.

4.3 SYSTEM FORMS AND DESIGN

Project's administrative flow of operations and standard operating procedures

Standard operating procedures within the company will be ensuring the safety of people involved. To be accurately follow schedule and maximizing the production requirement and also for lessening malfunctions in the business. Like, closing of the business every afternoon should be in secured. Its goal is to secure the business place and equipment until a staff will arrive in the morning.

Figure 2 flow of operations

5.0 MARKETING FEASABILITY

5.1 Market Description

The scope of our market will be inside the premises of St. Thomas More Montessori School since the population is ideal to meet the amounts of products that we will sell so that no scarcity will arise. The population of the high school is approximately 107 students while the teachers are ranging about 17 only. The said population will be our customers for the entire week. The price limit will be PHP 20 since most of the students' allowance is PHP 100 and up.

5.2 Demand

St. Thomas More Montessori School consists of high school students where the products that we are going to sell are in high demand because aside from the fact that people tend to eat, is that the canteen may not sell what the students wants. The population of the high school is approximately 107 students while the teachers are ranging about 17 only. The said population will be our customers for the entire week. The price limit will be PHP 20 since most of the students' allowance is PHP 100 and up.

5.3 Supply

There will be an ending inventory will be left, we will be going to adjust the buying of supplies, so that use of inventories will be implemented correctly. We limit our supply of 70% of the STMMS students and teachers' population, since

we concluded not all the customers will buy and some are normal buyers only. We will be serving 40 kilograms of fries, 2,400 pieces of tokneneng, 400 kilograms of green mango and 40 gallons of homemade Nestea estimated for 1 month only. The servings of each product will depend on the demand of the students' wants.

5.4 Supply and Demand Analysis

The price of the commodity is determined by the interaction between the quantity of the products that producers wish to sell at various prices and the quantity that consumers wish to buy.

5.5 Marketing philosophies and Tasks

A. Conversational Marketing

The way we communicate online is constantly changing. In today's on-demand world, users have come to expect a more personal experience; one of that can't be provided using forms and traditional follow-up days later. Finally, the strategy and easy way that we communicate the customers is messenger and social monitoring to foster genuine conversations and relationship. When you have a business you should also a talkative person so that you can builds relationship and create authentic experiences with customers and buyers.

5.6 Proposed Marketing Program

Target Market

The Meet n' Eat have a vast selection of products to serve the needs of customers and these are: Green Mango, Tokneneng, Fries, and Nestea. These particular needs will be best served to St. Thomas More Montessori School students since this is in higher demands considering the fact that the canteen lacks these kinds of varieties of food. The coverage and the scope of our business will be inside the STMMS school campus.

Figure 3 Demographic Profile

Marketing Research and Development (R&D) Program

Meet n' Eat will involve researching our market and our customer needs and developing new and improved products and services to fit these needs. Innovation and increased productivity and can boost our business's competitive advantage. We will be focusing more on product improvement because of budget and cost limitations.

Product-Mix Strategies

Product Width: The Meet n' Eat has four product lines and these are: Green Mango, Tokneneng, Fries, and Nestea.

Product Depth: There will be 3 flavors of fries, therefore there will be an average of six number of items to be offered.

Product-Mix Consistency: Consistency is relationship. Our product lines are consistent since all are the same and they have the same use and distributed the same way.

Market Timing and Scheduling Strategies**Introduction Stage**

Rapid skimming- we will launch the product at a high price and high promotional level. It aims to establish a clear brand identity to connect with the right partners to promote your product. Also, sets up consumer tests, or provide samples or trials to key target markets. Price the product or service as high as you believe you can sell it, and to reflect the quality level you are providing

Growth Stage is the stage of Improving product quality, adding new product features or support services to grow your market share. We will enter new markets segments. Keep pricing as high as is reasonable to keep demand and profits high. Increase distribution channels to cope with growing demand. Shifting the marketing messages from product awareness to product preference and skimming product prices if our profits are too low.

Maturity Stage. Market modification - this includes entering new market segments, redefining target markets, winning over competitor's customers, converting non-users. Best example of product modification is adjusting or improving your product's features, quality, pricing and differentiating it from other products in the marking.

Decline Stage. Reduce our promotional expenditure on the products. Reduce the number of distribution outlets that we will sell. Implement price cuts to get the customers to buy the product. Find another use for the product. Maintain the product and wait for competitors to withdraw from the market first. Harvest the product or service before discontinuing it.

Pricing Strategies

The Meet n' Eat will be using the Cost-plus pricing—simply calculating your costs and adding a mark-up.

Terms and Conditions of Sales Strategies

Discounts and Allowances- the Meet n' Eat will be giving reduced prices to reward customer responses like promotion and we will give discount also to loyal customers.

Branding and Packaging Strategies

The Meet n' Eat will be using the common (family) names for all of our products. Our brand scheme will be "Improved look, great taste" making our product stand out so that it will be easily differentiated from our other competitors. Add Personality and keeping it simple to break convention.

Labelling Strategies

The Brand and Product Identity will be labelled together with the grade and type that will be in lined with the requirement of law. Putting description in order for our customers to know what product it is and identify our products also by the help of promotions.

Advertising and Promotions Strategies

We consider personal selling because it is a strategy that sales people use to convince customers to buy the product. It is a two-way communication and it builds trust and capture value from customers.

These will be the *publicity strategies* that we will be using:

- Sales presentations &
- Fliers

5.7 Projected Sales

The business has the profitable chance to increase because it has its natural environment where it will be located in the school premises and no seasons is required because of the fact that food is our daily needs unless it is not a working day because our target market are the students and the teachers. The factors that will also affects our business is when there will be a holiday break or anything similar to it for that will be the reason that we will no longer have enough customer to buy our products

Table 6 Projected Cost

Sensitivity Analysis

Figure 3 Sensitivity Analysis

This shows the projected sales of our products in 5 years with continuous sales in a 200 number of school days.

6.0 Production or Technical Feasibility

We will offer four products in our food career in business. These products may not be new to customers' tastes and eyes but we will make sure that serving every one of them takes the right processes. For Fries, we will consider the different tastes of our customers so we will offer three (3) flavours: cheese; barbeque; and sour and cream. For Green Mango, we will also provide varieties in choosing their own sauce to it. For Tokneneng and for our Nestea we will be referring last years' experience. For last years' experience we had also sell tokeneng and Nestea. The procedures will be the same but we will innovate something out of it.

6.1 Detailed Description of Product

Flavorings	Food coloring	Vinegar	Ice
	Salt	Salt	Calamansi
	Water		Sugar

Table 7 Projected Cost

Processes: *(Note: Make sure that the place is clean and must wear an appropriate attire.)*

For Fries:

1. Put a Salt in the water, rinse potatoes in several changes of cold water in bowl (more ice isn't necessary) until water is clear. Drain in a large colander.
2. Spread potatoes out in a single layer on several layers of kitchen towels to drain, then pat dry.
3. While potatoes are being rinsed and dried, heat 2 inches oil slowly in a 5- to 6-quart pot over medium-low heat until thermometer registers 300°F.
4. When oil is ready, increase heat to high and fry potatoes in four batches, stirring occasionally, until just cooked through but still white, about 3 minutes. (Adjust heat to keep oil as close to 300°F as possible and return oil to 300°F between batches.) Transfer fried potatoes with a slotted spoon to a baking sheet lined with dry towels to drain. When all potatoes are fried once, cool the potatoes to room temperature, about 30 minutes.
5. Reheat oil over medium-high heat until thermometer registers 375°F. Fry potatoes again in four batches, stirring, and adjusting heat to keep oil as close to 375°F as possible, until deep golden, 3 to 4 minutes. (Return oil to 375°F between batches.) Transfer with slotted spoon to dry towels to drain briefly, then season with salt and serve immediately, with sauce(s) for dipping.

For Tokneneng:

1. Put the corn-starch in a container and dredge the boiled chicken eggs. Set aside.
2. Combine all-purpose flour, salt, and pepper then mix thoroughly.
3. Dilute the annatto seeds in water until the reddish colour comes out. Combine the liquid with the flour-salt-pepper mixture and mix thoroughly.
4. Put the boiled chicken eggs in the mixing bowl and coat with the batter.
5. Heat the pan and pour the cooking oil.
6. When the oil is hot enough, deep-fry the eggs until the coating is crispy. Use a serving spoon to scoop the eggs from the mixing bowl.
7. Remove the fried eggs from the pan and place in a serving plate.
8. Serve with vinegar or special sauce.

For Green Mango:

1. In a small bowl, mix the chili powder and salt.
2. Place the chopped or sliced mango in a bowl, evenly spread.
3. Sprinkle the mango with the chili powder/salt mix, then serve.

For Nestea:

1. Pour the powdered iced tea in a container together with the drinking water and mix it.
2. Put the crushed ice in a disposable cup

3. Pour the iced tea in a disposable cup
4. Serve it to the customer.

6.3 Project Site

The project site shall be located at St. Thomas More Montessori School, Doctolero Avenue, Tagum City.

10.0 Conclusion

The Feasibility Study proposes the school canteen's lack of variety of foods for students together with knowing what the students' demand with what kind of food being in the highest rate in Tagum City.

Technically, the proposed system will handle the estimated quantity of products throughout the year 2020 in accordance with the generally accepted estimated price that suits the students' daily financial allowance.

The Meet N' Eat will surely provide the quality product to the students' of STMMS to purposely satisfy their needs because of the canteen's lack of food choices.

The proposal, as detailed, is sound and urgently needed for the improvement of their way of living by getting and achieving the students' wants.

The Feasibility Study has verified the demographic, economic, and other environment that has a factor in establishing this business. It also verified who the customers will be served. In view of the situation, the study also evaluated the financial feasibility and proposed plan of this business.

Many canteen users, together with staff, indeed choose their kind of food but canteen serve only what's available and don't have much of variety. This study suggests that students do select foods according to their wants and this "wants" will become demand because of the majority of people with the same particular wants. Compounding the problem could be that the canteen did not seem to serve enough types of friendly food.

10.1.1 Benefits of the project

The benefits of this feasibility study are that Meet N' Eat will supply the students' demand for trendy food and for them to satisfy their needs and wants together with creating a valued relationship with them.

10.1.2 Recommendation

10.1.3 IMPLEMENTATION OF THE PROJECT

The feasibility study concluded that the implementation of our project is feasible and financial amount is essential. The school canteen should take the first

action to realize and take a decision to have a variety of product for sale with accordance to the students' demands. This will help the canteen to attract more customers.
