## 1. Exclusive summary

Based on the large urban expansion in the buildings construction in Jordan, the marble ore in Ajloun area has an economic value to extract and produce panels to be used in various construction purposes, where Ajloun Marble is characterized by hardness high, low porosity and different colours. so, the idea of extracting and processing marble is economically feasible.

Based on the proposed market share and prices, which have been considered for the proposed project, the estimated revenues will be 3,211,168 Jordanian dinars during the first year of the life of the project and gradually rising to 4,189,846 Jordanian dinars during the tenth year, the payback period is 3 years and the internal rate of return is 35.0%. In addition of creating 13 jobs opportunities.

**Table 1 Project Main Indicators**

| Indicator                                 |            |
|-------------------------------------------|------------|
| Total Investment Cost (Jordan Dinars)     | 1,468,057  |
| Internal Rate of Return (IRR)             | %35.0      |

| Net Present Value (Jordan Dinars)         | 3,210,953  |
| Job Opportunities provided by the Project | 13         |
| Total Revenues (For 10 Years)             | 36,812,442 |
| Total Operating Expenses (For 10 years)   | 29,762,860 |
| Total Net Profit (For 10 years)           | 2,908,296  |

## Key Highlight of Jordan

Jordan Hashemite Kingdom area is 89342 Kilometers with a population exceed 9.8 Millions distributed among 12 Governorates.

Jordan is bounded by Saudi Arabia, Iraq, Syria and Palestine from the South, East, North and west respectively. Jordan climate is mostly arid desert with rainy season between November to April Months.

Jordan is a free market economy, ranked as the fifth freest economy in the MENA region in the Index of Economic Freedom. Its free market economy enjoys strong partnerships amongst its neighboring country as well as Europe and the USA. Jordan is a signatory of several bilateral and multilateral trade agreements such as (Free Trade Agreement with the US and the EU, a Free Trade Agreement with the EFTA states, an FTA with Singapore, A member of the Greater Arab Free Trade Agreement (GAFTA) and a signatory of the Aghadir Agreement. Looking at the range of countries these agreements cover and facilitate trade between, one is confident to say that Jordan has business gateways and partnerships across the globe.

## Population Overview

Based on the latest surveys done by Department of Statistics (DOS) in 2017, total number of population has reached around 9.814.995 with an increase rate of 2.88% from 2016 year, figure below summarizes the population distribution among the kingdom governorates.

Figure 1 Population of Jordan

Department of Statistics (DOS), 2015

Moreover, and based on the latest survey conducted by (DOS) which related to population nationality distribution over the governorates, it was found that total Non-Jordanian residents constitutes around 30% of the total population. Half of these are Syrians (1.3 Million) concentrated mainly in Amman Capital (436 Thousand) then Irbid (343 Thousand), Mafraq at 208 Thousand and Zarqa at 175 Thousand.

Jordan prides itself in its youthful population with 35% of ages below 15 years old and only 4% with ages above 65 years old. Table below summarizes population distribution of Jordanians according to Age Group:

**Table2 Population Distribution according to Age Group:**

| Age Group                 | Population % | Males | Females      |

### Overview of Jordan Economy

Classified as an upper middle economy by the World Bank and as a country of High Human Development by the UNDP, Jordan is an important financial power in the Middle East. Its small market witnessed growth in the last two decades since King Abdullah II accessed the throne. Jordan's GNI per capita has increased in the last four years due to the basket of economic reforms that were enacted in the recent decade such as (the new Income Tax Law, Public Private Partnership Law and Investment Law). These laws aim to encourage the participation of the private sector in the Kingdom's economic development and provide an enabling legislative environment for current and new investment opportunities.

The Jordanian economy is overwhelmingly services oriented and its contribution in the GDP is 68.1%. The contribution of the industrial sector is 22.4%, the construction sector is 4.2% and the agricultural sector is 2.9%. These contributions are aimed to increase to (27.4%), (5.8%) and (3.4%) respectively and that of the service sector is due to decrease according to Jordan 2025 vision.

**Figure2 Sectors Contribution to Jordan's Economy**

Jordan's exports include variety of textiles, potassium, phosphates, fertilizers, vegetables and pharmaceutical products. While it's main imports are crude and refined petroleum. Distinguished by its strategic location, on the crossroads between Asia, Africa and Europe with strong connections to the Levant and the GCC, Jordan has a regional market of interest that represents US\$3.8 trillion market and compromising 380 million consumers.

Jordan infrastructure ranks comparatively well (38th out of 148 comparable economies), with an extensive 8000 KM road network connecting Jordan domestically and externally The new Queen Alia International Airport and the Port of Aqaba are the major gateways to the international market. In addition to some mega projects such as the Red- Dead Sea Canal and the national railway network that will be developed to position Jordan as a hub for regional commerce.

Jordan banking system is quite sophisticated, resilient and in compliance with international standards, making it very attractive and trustworthy to investors. This is reflected in the fact that 50% of equity in licensed banks in Jordan is held by non-Jordanians, and non residents' deposits in Jordanian banks witnessed a steady growth of 19.2%.

Moreover, realizing the value of MSMEs to drive economic growth, the government has developed the national Strategy for the encouragement of entrepreneurship and the development of micro small and

medium sized enterprises for 2015-2019. This shows the commitment of the Jordan government to enhance the private sector development and leveraging the country's strong human capital.

Jordan prides itself in its youthful population. It's the country most valuable capital. A tech savvy well educated and trained workforce attracts a lot of investors to Jordan. More than 20.4% of Jordan's GDP is dedicated to the education and capacity building for the labor force, this has resulted in securing a 91% literacy rate and enabled Jordanians to be among most hired and qualified middle-eastern workforce.

Such solid, diverse and resilient characteristics of the Jordanian economy and investment scene position Jordan as a competitive investment destination.

### Major Economic Indicators

- **GDP Growth**

The Jordanian economy slowed and reached 2.4 percent in 2015 compared to growth rate of 3.1 in 2014 and similar to MENA growth rates.

The growth also slowed for trade, restaurants and hotels; manufacturing; transport; and electricity and water. Meanwhile, finance, insurance, and business services advanced at a faster pace.

- **Inflation rate**

Inflation rate decreased to 0.9 in 2015 after 2% decline in the previous year. Inflation Rate in Jordan averaged 3.1 percent from 2011 until 2015.

- **Unemployment**

The unemployment rate in Jordan was recorded at 13 percent in 2015, comparing to 11.9 percent a year earlier. This increase due to the current instability in the labor market structure as well as high competition from low cost foreign labors especially from Syria.

- **External Sector**

A number of risks manifested in 2015, the closure of land trade routes with Syria and Iraq and the deepening instability in the region adversely impacted many external sector indicators such as trade, tourism and direct Investment.

Moreover, loans disbursements increased by JD 545.3 million, due to the use of the International and Arab Monetary Funds (IMF and AMF) credit facilities. As an outcome of these developments, the overall balance of the balance of payments registered a surplus of JD 328.7 million in 2015, compared with a surplus of JD 1,550.7 million in 2014.

Further, net international investment position (IIP) witnessed an increase in the Kingdom's net obligations to abroad; to reach JD 24,357.5 million, compared to a net obligation of JD 22,578.8 million at the end of 2014 as a result of the increase in the stock of external financial assets and liabilities of all resident economic sectors to reach JD 18,657.9 million and JD 43,015.5 million; respectively.

External Debt in Jordan increased to 9390.50 JOD Million in 2015 from 8030.10 JOD Million in 2014. External Debt in Jordan averaged 5433.67 JOD Million from 1988 until 2015, reaching an all time high of 9390.50 JOD Million in 2015 and a record low of 3640.20 JOD Million in 2008.

### Investment Climate in Jordan

Investment in Jordan is considered as one of the vital sources to boost the economy considering that Jordan's economy is among the smallest in the Middle East, with insufficient supplies of water, oil, and other natural resources, underlying the government's heavy reliance on foreign assistance.

The country's location, supported by myriad free trade agreements (FTAs) offering access to 1.5bn consumers, enables the kingdom to be a strategic trade route to many of its neighboring countries and regions.

Jordan aspires to create a competitive investment destination capitalizing on its many advantages mentioned above. The government focused its efforts to implement significant advances in structural and legal reform. These efforts are represented in the new Investment Law of 2014, the tax law, in addition to other endeavors related to providing greater access to credit for MSMEs, and by providing greater investment incentives to specific priority sectors identified by the new Investment law and the Jordan 2025 vision.

furthermore, in its endeavor to enhance the business environment, several geographically industrial states were created across the kingdom. These range in type to include (industrial estates, free zones and special economic zones). Under the new Investment Law, these zones are given a number of incentives that include a tax rate of 0% on exports, sales tax, import duties, social service tax, dividends tax and a 5% income tax from all economic and manufacturing activities undertaken in the development zones. As for the investments in Free Zones, they enjoy Exemptions from customs duties, income tax exemptions and exemptions from land and building taxes among others. Both development and free zones also enjoy facilitations regarding visa and residency permits for investors and workers in addition to Repatriation of capital and profits in a convertible currency. Such estates have succeeded in attracting relatively large amounts of FDI to Jordan.

### Key National Investment Priorities:

Jordan Investment commission worked on taking a leading role in the application of government policies to promote and attract domestic and foreign investments and create an investment environment that stimulates economic performance through investment promotion strategy launched in 2016

Jordan investment commission aims to:

- Regulating the special provisions governing Development Zones and Free Zones in the Kingdom and developing them placing them in service of the national economy as well as monitoring their functioning.
- Developing plan and programs to stimulate domestic and foreign investments.
- Establishing trade centers and organizing exhibitions as well as opening markets and organizing trade missions in order to promote national products, in addition to marketing and development of national exports and encouraging investment.
- Taking appropriate decisions related to private or public institutions to improve Investors' confidence in Jordan's investment environment.

## 2. Market Analysis

### Project Description

Based on the local reserve / Jordanian ores of marble which is about 1.415 million m<sup>3</sup>, the idea of the exploitation of marble ore that starts by extracting, and end use in decorative purposes, decoration and construction works can be considered as feasible idea which has benefits to the local community in terms of creating jobs and providing the local market of marble products with local competitive advantages and increasing competitiveness to up grade the quality of the production of marble, as well as it well project be economically feasible for the investor.

### Marble

Calcline metamorphic rock consists of very pure calcite (crystalline form of calcium carbonate). Used in sculpture, as well as used as constructive material, and in many other purposes. It have been formulated under rare conditions of pressure and temperature underground. Most famous several country in are well known in production of marble as: Palestine, Turkey, Italy, which is the most famous country.

The marble is divided into two types:

- Natural marble: two sections the first was originally sedimentary or metamorphic rocks, and the other is originally Igneous rocks
- industrial marble: as a result of a chemical manufacturing which is based on certain steps to get finally a material which can be used serve as a substitute of natural marble in the construction works.

Marble is also classified according to its chemical composition to:

- Alcalceta marble mainly consists of calcite material, and five percent of the material is magnesium carbonate.
- Dolomitic Marble: In this type of marble the contents of the material of magnesium carbonates is increasing to be ranging between (5-45%) of the total composition, so it is founded in several gradations of colours, based on the proportion of the presence of this material in it.
- Alakiqi Marble: This type of marble is characterized and pure colour; and because of its contents of calcium carbonate, which was formed slowly due to deposition of cold water springs. The Alakiqi marble is spreads in yellow, brown, greencolour and distinguished mainly by transparent layers formation, which increases the beauty of its shape, and its rarity.

- Marble vivid stone: This type of marble contain varying proportions of natural impurities, which makes it a mixed chromatically, between roasy and gray colour, and it contains abundant levels of metal serpentine "hydro magnesium silica" that increases the hardness, the unit colours.
- Marble travertine: This type of marble is a chemical deposition material calcite dissolved in hot spring water, which is usually saturated with carbon dioxide, leading to be formed as monolithic layers, containing crystalline pores, varying in size

The following table shows the marble acurances in Jordan:

**Table 3 The marble ocurances in Jordan**

| Area              | Reserve (m <sup>3</sup> ) |
|-------------------|---------------------------|
| West dabaa        | 60,000                    |
| Eest dabaa        | 130,000                   |
| West tlol alhamam | 120,000                   |
| Tlol alhamam      | 260,000                   |
| Alkerb alromanya  | 60,000                    |
| South swaqa       | 560,000                   |
| Mqala alasad      | 225,000                   |
| Ajloun area       | 200,000                   |
| <b>total</b>      | <b>1,615,000</b>          |

Source: Energy and Mineral regularity Commision

### Project Objectives

The project objectives are summarized in the following points:

- The project aims to extract and produce some of industrial forms of marble which complies with the requirements of the domestic and market export which can be used either indoors or outside in order to achieve diversity in the proposed production of this ore.
- Due to the high unemployment rate in Ajloun, the project will create jobs opportunities for the local comunity.
- Increasing the export of raw marble and open prospects for export.
- The demand of marble increased recent ly because of the massive urban revolution as one of its important components either locally or extremaly, and that allows to open the prospects for export and achieves one of the goals of the project.

## Proposed Product

Marble have many uses, including:

I. used in the construction of internal and external works:

1. for the floors and stairs: Marble gives a beautiful sight calm and grandeur of the place, but should not be used on floors that are exposed to tremendous pressure and absorption because of high absorption rate of marble were the granite absorption rate is very low.

2. The external faces of buildings: It is possible to use marble in the external faces of the buildings but the texture is different from the smooth texture applied to the floor. A coarse marble texture will be used.

Weight and thickness and marble area should be taken into account during the planning.

3. Walls: The same marble used for external faces, the only difference lies in the texture, as the texture of the walls will be smooth.

4. Columns: The marble used in columns decoration to give a modern luxury to its appearance.

5. Bathrooms, laundries: There are promising colours and shapes to decorate bathrooms and laundries. For sinks it should be pre-selected marble in order to cut to fit the sinks, the thickness that are often selected for this purpose is 3 centimeters.

6. Kitchen: Preferably use dark colours for the counter top and add insulating and polishing, materials. As for the thickness it is recommended to choose 3 cm.

I. Other uses:

2. Covering the area adjacent to the door frames and windows.

3. Design sculptures and art pieces.

## Targeted categories

The proposed project targeting the following categories:

- luxury company for marble and granite.
- ACCESS Company for Natural Stone
- Kairouan commercial company.
- Other companies.

### Market Size Analysis

Marble domestic production amounted to about 273 340 m<sup>3</sup> and the volume of exports reached 9340 m<sup>3</sup>. Based on these statistics referred to the statistics of the Ministry of Energy and mineral Resources of Jordan, the establishment of a project for the extraction and processing of Jordanian marble ores in Ajloun area, which is characterized by high quality will encourages investors to be exploited. The approvals should be taken for the necessary energy and minerals Regulatory Commission.

The size of marble market depends on the size of the construction works in Jordan. The following table shows the construction activity in Jordan, based on construction licenses and construction area (area of a thousand meters) during the period (2012-2016):

**Table 4 Volume of construction in the Kingdom during the period (2012-2016), (1000 m<sup>2</sup>)**

| Period                           | 2012            | 2013            | 2014            | 2015            | 2016            |
|----------------------------------|-----------------|-----------------|-----------------|-----------------|-----------------|
| <b>Housing</b>                   |                 |                 |                 |                 |                 |

### Competitor Analysis

Marble is one of high-exploitation of materials in Jordan, based on the local production capacity, there are many companies exploiting marble such as:

- Majid Rajabi & Bros. Co.
- United Brothers Inc.
- Other companies

### Market Share

A quarry producing of 8,000 m<sup>3</sup> will be established with a market share estimated at 3% based on technical experience, its possible to increase the production capacity wich leads to increase the market share based on supply and demand in the local market.

### Price Analysis and Pricing Policy

Marble existing prices used in the construction works and decoration in the domestic market is ranging between 12-17 Jordanian dinars per square meter, based on the product category, as well as, the export and import volumes of raw marble. There is a great chance to compete with production capacity estimated at 8000 m<sup>3</sup> /year in addition to export, the following table shows the expected annual revenues of the project.

Table 5 Expected Prices

| Product                     | Ratio (%)  | The annual production (m <sup>3</sup> ) | Annual production (M <sup>2</sup> ) | Price m <sup>2</sup> (JD) | Price m <sup>3</sup> (JD) |
|-----------------------------|------------|-----------------------------------------|-------------------------------------|---------------------------|---------------------------|
| Main product (polished)     | 80         | 6,400                                   | 213,120                             | 15                        | -----                     |
| By product (created marble) | 20         | 1,600                                   | ----                                | -----                     | 7                         |
| <b>total</b>                | <b>100</b> | <b>8,000</b>                            |                                     | -----                     | -----                     |

It was assumed that one cubic meter of marble gives 33.33 m<sup>2</sup>, and t the production capacity of 8,000 m<sup>3</sup> per year during the year (2018-2027) 3% annual price incremental have been assumed as well.

## Expected Revenues Analysis

**Table6 Projected annual revenues for 10 years (2027-2018)**

| Description                                  | 2018           | 2019           | 2020           | 2021           | 2022           | 2023           | 2024           | 2025           | 2026           | 2027           |
|----------------------------------------------|----------------|----------------|----------------|----------------|----------------|----------------|----------------|----------------|----------------|----------------|
| Price of the meter square of polished marble | 15.00          | 15.45          | 15.91          | 16.39          | 16.88          | 17.39          | 17.91          | 18.45          | 19.00          | 19.57          |
| Price of cubic meter of cracked marble.      | 7.00           | 7.21           | 7.43           | 7.65           | 7.88           | 8.11           | 8.36           | 8.61           | 8.87           | 9.13           |
| Polished marble revenues                     | 3199968        | 3295967        | 3394846        | 3496691        | 3601592        | 3709640        | 3820929        | 3935557        | 4053624        | 4175232        |
| cracked marble revenues                      | 11200          | 11536          | 11882          | 12239          | 12606          | 12984          | 13373          | 13775          | 14188          | 14613          |
| <b>Total of Revenues</b>                     | <b>3211168</b> | <b>3307503</b> | <b>3406728</b> | <b>3508930</b> | <b>3614198</b> | <b>3722624</b> | <b>3834303</b> | <b>3949332</b> | <b>4067812</b> | <b>4189846</b> |

### 3. Technical analysis

#### Human resources required

**Table7 Human resources requird for the project**

| Job description  | No.       |
|------------------|-----------|
| Project manager  | 1         |
| Technical cutter | 2         |
| Accountant       | 1         |
| Labour           | 2         |
| Driver           | 4         |
| Security guard   | 2         |
| Cleaning labour  | 1         |
| <b>total</b>     | <b>13</b> |

The following is a clarification of the job description of the workforce:

- **General Manager:** proposing the general policy of the plant, preparation of plans and follow up the implementation, technical and administrative supervision of staff, development of procedures, ensuring of occupational health and safety requirements.
- **Accountant:** Follow up money aspects, financial, auditing, and preparing of the annual report of the financial situation.
- **Driver:** transporting and distribution of products to customers.
- **Cleaner:** maintaining the cleaning of the working area.
- **Guard:** guarding the site and maintaining the security of at the site.

### Location analysis

The plant will be established at Ajloun area, after getting the necessary Licences from the concerned governorate and departments.

### Description of production process and steps of manufacturing

Extracting marble ore from its occurrences locations will be carried out by using special stone shearing to be produced in panels form to be used in the construction and decoration works, after shearing process, about 20% of the ore will be not suitable for the use of decoration and adornment (rubbles), which will be extracted by mechanical processing using a jaw crusher and then sieved to define the particles distribution; the soft will be used directly in the construction works and the rough part is divided into two parts, one returns back to the crushing stage and the other is used in construction works.

Figure (3) Flow sheet of marble processes

## Technical requirement analysis

### Land and construction works

A license for quarry for agricultural lands reclamation will be taken since it is not allowed take quarry license in Ajloun due to its privacy in the large number of trees therefore its allowed to take a license for the reclamation of land and can be renewed annually and extended. According to the recommendations of the Central Committee of State Property / Energy and Minerals sector Regulatory Commission.

The construction works required for the project is shown in table (7):

**Table8 construction work required**

| construction works | Area(M <sup>2</sup> ) |
|--------------------|-----------------------|
| Building purposes  | 150                   |
| Hunger             | 500                   |
| Other              | -                     |

### Equipments and machines

The following table shows the machinery and equipment needed for the project,:

**Table 9 machinery and equipment**

| Machine                   | Number |
|---------------------------|--------|
| loader                    | 1      |
| Crushing machine          | 1      |
| Cutter machine            | 1      |
| dumber                    | 1      |
| Seivig machine            | 2      |
| Secondry crushing machine | 1      |
| small saw                 | 2      |

## Furniture

**Table10 furnitures**

| Description | Cost   |
|-------------|--------|
| furnitures  | 10,000 |

## Vehicles and transportation

The following table shows a list of vehicles and transport equipment required for the project:

**Table11 vehicles and transport media required for the project**

| Vehicles and transportation | Number |
|-----------------------------|--------|
| Transporte and Vehicles     | 2      |

#### 4. Financial Analysis

The Financial Part illustrates all the assumptions which were used when we have developed the study including project expenses related to capital expenditures, operating expenses ( Fixed and Variable costs) followed by illustrating project revenues.

##### Assumptions

##### Calculation Assumptions:

- The weighted average cost of capital used in the study is %10.75 as it was calculated considering risk free and debt Interest rates as well as Market risk premiums to consider alternative opportunity costs for investor.
- Project working capital has been estimated and added to project cash outflows at the beginning of the project and annual increase in working capital has been also estimated and added to the operating expenses then net working capital has been added to total cash inflows at the end of project lifetime.

The time span for the financial study is 10 years starting from 2018, where annual increase rates have been estimated as per the tables below:

## Assumptions

**Table12 General Assumptions**

| General Information                   |               |
|---------------------------------------|---------------|
| All Financial Numbers (Currency)      | Jordan Dinars |
| Financial Study Time Span (Years)     | 10            |
| Expected Project First Operating Year | 2018          |
| Last Year in the Financial Study      | 2027          |

**Table13 Currency Exchange Rates**

| Exchange Rates  | Jordan Dinars |
|-----------------|---------------|
| American Dollar | 0.708         |
| Euro            | 0.760         |

**Table14 Annual Growth Rates Assumptions**

| Annual Growth Rates                        | Average |
|--------------------------------------------|---------|
| Annual Population Growth Rate              | 2.20%   |
| Annual Sales Price Increase Rate           | 3.00%   |
| Annual Expenses Increase Rate              | 3.00%   |
| Annual Increase Rate in Employees Salaries | 4.1%    |

### Capital Expenditures

The estimated cost of the project is 1,468,057 JD and it covers land costs, construction works, machinery and equipment, furniture, pre-operating expenses and working capital. The following tables summarize the details of these expenses:

**Table18 Construction Work Capital Expenditure**

| Description        | Cost (JOD per Squared) | Area | Gross Cost    |
|--------------------|------------------------|------|---------------|
| Construction Works | 200                    |      | 30,000        |
| Hungers works      | 100                    |      | 50,000        |
| Other Works        |                        |      | 8,000         |
| <b>Total</b>       |                        |      | <b>88,000</b> |

**Table19 machinery and equipments Capital Expenditure**

| Description               | No. | Cost(JOD per unit) | Gross cost     |
|---------------------------|-----|--------------------|----------------|
| loder                     | 1   | 60,000             | 60,000         |
| Crushing machine          | 1   | 40,000             | 40,000         |
| Cutter machine            | 1   | 70,000             | 70,000         |
| dumber                    | 1   | 200,000            | 200,000        |
| Seivig machine            | 2   | 25,000             | 50,000         |
| Secondry crushing machine | 1   | 40,000             | 40,000         |
| Miny saw                  | 2   | 25,000             | 50,000         |
| <b>Total</b>              |     |                    | <b>510,000</b> |

**Table20 Furniture and furnishings Capital Expenditure**

| Description  | No. | Cost(JOD per unit) | Gross cost    |
|--------------|-----|--------------------|---------------|
| furniture    | -   | -                  | 10,000        |
| <b>Total</b> |     |                    | <b>10,000</b> |

**Table21 vehicles and trasnportations Capital Expenditure**

| Description             | No. | Cost(JOD per unit) | Gross cost    |
|-------------------------|-----|--------------------|---------------|
| Medium vehicle (pickup) | 2   | 23,000             | 46,000        |
| <b>Total</b>            |     |                    | <b>46,000</b> |

**Table22 Pre Operating Expenses**

| Pre-operating expenses | Estimaited cost (JD) |
|------------------------|----------------------|
| Governmental fees      | 500                  |
| Transportation         | 750                  |
| Marketing              | 500                  |
| Training               | 750                  |
| <b>Total</b>           | <b>2,500</b>         |

The initial working capital reflects the project's amounts needed to cover all the expenses during operation until the project starts generating income, the following table shows the components of the initial working capital:

**Table23 Working Capital**

| Working Capital                     | No. of | %   | Estimated Cost |
|-------------------------------------|--------|-----|----------------|
| Operating expenses                  | 3      | %25 | 649,057        |
| General and administrative expenses | 3      | %25 | 4,193          |

### Sources of Funding

The financing structure of the project consists of loans and Equity. The investment cost of this project is estimated at (1,468,057) JD, where 60% of the project will be financed through loans (880,834) JD, and the remaining (40%) through (Equity) with (587,223) JD. The following table summarizes the general structure of the required financing:

**Table25 Sources of Funding**

| Funding Sources        | Amount           | Percentage     |
|------------------------|------------------|----------------|
| Equity                 | 587,223          | %40            |
| Loans                  | 880,834          | %60            |
| Total                  | <b>1,468,057</b> | <b>%100</b>    |
| Use of Fund:           | Value            | Ratio          |

## Human Resources

The total annual salaries and monthly wages has been estimated on 16 months for the purpose of considering annual increments on salaries as well as payments related to social security and health insurance,... etc.

The following table summerizes the expected annual salaries and wages, considering annual increment on salaries as per the income statement:

**Table29 The projected staff number**

### Expected Balance Sheet

The balance sheet is one of the main statements which the project depends on, as it reflects the financial position of the entity and is usually estimated on the last day of the financial year.

All financial information and analysis of the project shall be the estimated for the years (2018-2027) as shown in the table below:

**Table 37 Expected Balance Sheet**

| Description                      | 2018             | 2019             | 2020             | 2021             | 2022             | 2023             | 2024             | 2025             | 2026             | 2027             |

### Feasibility Indicators

There are more than one method to calculate the discounted cash flow statement. However, in this study, WACC was used to calculate the discounted cash flows and net investment value. The Company's financing structure is based on equity and loans, therefore the discounted rate should be adjusted according to WACC based on the following assumptions, the following table illustrates the net expected free cash flow of the project:

**Table 38 Free Net Cash flows Table**

| Net Cashflows      | Pre- Operating | 2018   | 2019   | 2020   | 2021   | 2022   | 2023   | 2024   | 2025   | 2026   | 2027   | Final value |
|--------------------|----------------|--------|--------|--------|--------|--------|--------|--------|--------|--------|--------|-------------|
| Net Free Cashflows | (1,468,057)    | 340,58 | 427,68 | 440,79 | 454,37 | 468,45 | 483,05 | 498,19 | 513,90 | 530,22 | 547,18 | 8,426,874   |
| Discount Factor    | 1.00           | 0.74   | 0.66   | 0.60   | 0.54   | 0.49   | 0.44   | 0.40   | 0.36   | 0.33   | 0.29   | 0.29        |
| Net Present Value  | (1,468,057)    | 250,70 | 284,25 | 264,52 | 246,19 | 229,18 | 213,37 | 198,69 | 185,06 | 172,40 | 160,64 | 2,473,973   |

Table below (38) illustrates payback period for the project, as it is one of the indicators which investors care about before taking the investment decision as they need to know when the project will return the invested amount of money. Payback period definition is the total required period so that the project generates total money equal to the total invested capital expenditure, as investor is always looking to return the full invested amount of money at the earliest possible.

**Table39 Payback Period**

| Payback Period | Pre- Operating | 2018     | 2019   | 2020   | 2021    | 2022    | 2023    | 2024    | 2025    | 2026    | 2027       |
|----------------|----------------|----------|--------|--------|---------|---------|---------|---------|---------|---------|------------|
| Net Free       | (1,468,057)    | 340,585  | 427,68 | 440,79 | 454,379 | 468,455 | 483,050 | 498,191 | 513,907 | 530,229 | 547,189    |
| Project Value  | 1,468,057      | 1,127,47 | 699,78 | 258,98 | )       | )       | )       | )       | )       | )       | 3,236,414) |
| Payback Period | 3              | 1        | 1      | 1      | 0       | 0       | 0       | 0       | 0       | 0       | 0          |

**Table 40 Financial Analysis Results**

| Indicator                               | Value     |
|-----------------------------------------|-----------|
| Weighted Average Cost of Capital (WACC) | %10.75    |
| Net Present Value for Cashflows         | 3,210,953 |
| Payback Period                          | 3         |
| Internal Rate of Return                 | %35.00    |

#### Sensitivity Analysis

Sensitivity analysis is conducted to investigate the effects of changes in significant inputs of the financial analysis. This includes changes in revenues, total investment costs, and operating costs.

**Table 41 Sensitivity Analysis**

| Sensitivity Analysis                | Internal Rate of Return | Payback Period | WACC   |
|-------------------------------------|-------------------------|----------------|--------|
| Original Scenario                   | %35.00                  | 3              | 10.75% |
| Revenues declined by 10%            | %33.07                  | 3              | 10.75% |
| Operating Expenses Increased by 10% | %20.03                  | 6              | 10.75% |

#### Conclusions and Recommendations

Based on the profitability analysis and considering that project internal rate of return is higher than WACC, it is concluded that the project is feasible as the net present value for the project is positive 3,210,953 Jordan Dinars considering that the project provides 13 Job Opportunities for the governorate residents.
