## 1. Executive summary

The project aims to establish a herbs and medicinal plants factory in Ma'an Development Area, while encouraging farmers in Ma'an on the cultivation of herbs to purchase crops from them and from the rest of the governorates, whereby the shortage of herbs and medicinal plants will be imported from neighboring countries.

In addition to determining the types of rare plants that will be used in the area, where Ma'an has the advantage of having large quantities of the desired plants for aromatic and medicinal uses. The plant will extract the aromatic and medicinal oils from these plants then market them, after filling them in custom packages to fulfill Jordan's need of herbal extracts and the opportunity to export the products abroad due to the growing demand.

| Total Operating Expenses (For 10 years)   | 21,658,379 |
| Total Net Profit (For 10 years)           | 3,574,103  |

## Key Highlight of Jordan

Jordan Hashemite Kingdom area is 89342 Kilometers with a population exceed 9.8 Millions distributed among 12 Governorates.

Jordan is bounded by Saudi Arabia, Iraq, Syria and Palestine from the South, East, North and west respectively. Jordan climate is mostly arid desert with rainy season between November to April Months.

Jordan is a free market economy, ranked as the fifth freest economy in the MENA region in the Index of Economic Freedom. Its free market economy enjoys strong partnerships amongst its neighboring country as well as Europe and the USA. Jordan is a signatory of several bilateral and multilateral trade agreements such as (Free Trade Agreement with the US and the EU, a Free Trade Agreement with the EFTA states, an FTA with Singapore, A member of the Greater Arab Free Trade Agreement (GAFTA) and a signatory of the

Aghadir Agreement. Looking at the range of countries these agreements cover and facilitate trade between, one is confident to say that Jordan has business gateways and partnerships across the globe.

### Population Overview

Based on the latest surveys done by Department of Statistics (DOS) in 2017, total number of population has reached around 9.814.995 with an increase rate of 2.88% from 2016 year, figure below summarizes the population distribution among the kingdom governorates.

**Figure 1 Population of Jordan**

Department of Statistics (DOS), 2015

Moreover, and based on the latest survey conducted by (DOS) which related to population nationality distribution over the governorates, it was found that total Non-Jordanian residents constitutes around 30% of the total population. Half of these are Syrians (1.3 Million) concentrated mainly in Amman Capital (436 Thousand) then Irbid (343 Thousand), Mafrq at 208 Thousand and Zarqa at 175 Thousand.

Jordan prides itself in its youthful population with 35% of ages below 15 years old and only 4% with ages above 65 years old. Table below summarizes population distribution of Jordanians according to Age Group:

**Table 2 Population Distribution according to Age Group**

| Age Group  | Population % | Males | Females |

### Overview of Jordan Economy

Classified as an upper middle economy by the World Bank and as a country of High Human Development by the UNDP, Jordan is an important financial power in the Middle East. Its small market witnessed growth in the last two decades since King Abdullah II accessed the throne. Jordan's GNI per capita has increased in the last four years due to the basket of economic reforms that were enacted in the recent decade such as (the new Income Tax Law, Public Private Partnership Law and Investment Law). These laws aim to encourage the participation of the private sector in the Kingdom's economic development and provide an enabling legislative environment for current and new investment opportunities.

The Jordanian economy is overwhelmingly services oriented and its contribution in the GDP is 68.1%. The contribution of the industrial sector is 22.4%, the construction sector is 4.2% and the agricultural sector is 2.9%. These contributions are aimed to increase to (27.4%), (5.8%) and (3.4%) respectively and that of the service sector is due to decrease according to Jordan 2025 vision.

**Figure 2 Sectors Contribution to Jordan's Economy**

Jordan's exports include variety of textiles, potassium, phosphates, fertilizers, vegetables and pharmaceutical products. While it's main imports are crude and refined petroleum. Distinguished by its

strategic location, on the crossroads between Asia, Africa and Europe with strong connections to the Levant and the GCC, Jordan has a regional market of interest that represents US\$3.8 trillion market and comprising 380 million consumers.

Jordan infrastructure ranks comparatively well (38th out of 148 comparable economies), with an extensive 8000 KM road network connecting Jordan domestically and externally The new Queen Alia International Airport and the Port of Aqaba are the major gateways to the international market. In addition to some mega projects such as the Red- Dead Sea Canal and the national railway network that will be developed to position Jordan as a hub for regional commerce.

Jordan banking system is quite sophisticated, resilient and in compliance with international standards, making it very attractive and trustworthy to investors. This is reflected in the fact that 50% of equity in licensed banks in Jordan is held by non-Jordanians, and non residents' deposits in Jordanian banks witnessed a steady growth of 19.2%.

Moreover, realizing the value of MSMEs to drive economic growth, the government has developed the national Strategy for the encouragement of entrepreneurship and the development of micro small and medium sized enterprises for 2015-2019. This shows the commitment of the Jordan government to enhance the private sector development and leveraging the country's strong human capital.

Jordan prides itself in its youthful population. It's the country most valuable capital. A tech savvy well educated and trained workforce attracts a lot of investors to Jordan. More than 20.4% of Jordan's GDP is dedicated to the education and capacity building for the labor force, this has resulted in securing a 91% literacy rate and enabled Jordanians to be among most hired and qualified middle-eastern workforce.

Such solid, diverse and resilient characteristics of the Jordanian economy and investment scene position Jordan as a competitive investment destination.

### Major Economic Indicators

- **GDP Growth**

The Jordanian economy slowed and reached 2.4 percent in 2015 compared to growth rate of 3.1 in 2014 and similar to MENA growth rates.

The growth also slowed for trade, restaurants and hotels; manufacturing; transport; and electricity and water. Meanwhile, finance, insurance, and business services advanced at a faster pace.

- **Inflation rate**

Inflation rate decreased to 0.9 in 2015 after 2% decline in the previous year. Inflation Rate in Jordan averaged 3.1 percent from 2011 until 2015.

- **Unemployment**

The unemployment rate in Jordan was recorded at 13 percent in 2015, comparing to 11.9 percent a year earlier. This increase due to the current instability in the labor market structure as well as high competition from low cost foreign labors especially from Syria.

- **External Sector**

A number of risks manifested in 2015, the closure of land trade routes with Syria and Iraq and the deepening instability in the region adversely impacted many external sector indicators such as trade, tourism and direct Investment.

Moreover, loans disbursements increased by JD 545.3 million, due to the use of the International and Arab Monetary Funds (IMF and AMF) credit facilities. As an outcome of these developments, the overall balance of the balance of payments registered a surplus of JD 328.7 million in 2015, compared with a surplus of JD 1,550.7 million in 2014.

Further, net international investment position (IIP) witnessed an increase in the Kingdom's net obligations to abroad; to reach JD 24,357.5 million, compared to a net obligation of JD 22,578.8 million at the end of 2014 as a result of the increase in the stock of external financial assets and liabilities of all resident economic sectors to reach JD 18,657.9 million and JD 43,015.5 million; respectively.

External Debt in Jordan increased to 9390.50 JOD Million in 2015 from 8030.10 JOD Million in 2014. External Debt in Jordan averaged 5433.67 JOD Million from 1988 until 2015, reaching an all time high of 9390.50 JOD Million in 2015 and a record low of 3640.20 JOD Million in 2008.

### **Investment Climate in Jordan**

Investment in Jordan is considered as one of the vital sources to boost the economy considering that Jordan's economy is among the smallest in the Middle East, with insufficient supplies of water, oil, and other natural resources, underlying the government's heavy reliance on foreign assistance.

The country's location, supported by myriad free trade agreements (FTAs) offering access to 1.5bn consumers, enables the kingdom to be a strategic trade route to many of its neighboring countries and regions.

Jordan aspires to create a competitive investment destination capitalizing on its many advantages mentioned above. The government focused its efforts to implement significant advances in structural and

legal reform. These efforts are represented in the new Investment Law of 2014, the tax law, in addition to other endeavors related to providing greater access to credit for MSMEs, and by providing greater investment incentives to specific priority sectors identified by the new Investment law and the Jordan 2025 vision.

Furthermore, in its endeavor to enhance the business environment, several geographically industrial states were created across the kingdom. These range in type to include (industrial estates, free zones and special economic zones). Under the new Investment Law, these zones are given a number of incentives that include a tax rate of 0% on exports, sales tax, import duties, social service tax, dividends tax and a 5% income tax from all economic and manufacturing activities undertaken in the development zones. As for the investments in Free Zones, they enjoy Exemptions from customs duties, income tax exemptions and exemptions from land and building taxes among others. Both development and free zones also enjoy facilitations regarding visa and residency permits for investors and workers in addition to Repatriation of capital and profits in a convertible currency. Such estates have succeeded in attracting relatively large amounts of FDI to Jordan.

#### **Key National Investment Priorities:**

Jordan Investment commission worked on taking a leading role in the application of government policies to promote and attract domestic and foreign investments and create an investment environment that stimulates economic performance through investment promotion strategy launched in 2016

Jordan investment commission aims to:

- Regulating the special provisions governing Development Zones and Free Zones in the Kingdom and developing them placing them in service of the national economy as well as monitoring their functioning.
- Developing plan and programs to stimulate domestic and foreign investments.
- Establishing trade centers and organizing exhibitions as well as opening markets and organizing trade missions in order to promote national products, in addition to marketing and development of national exports and encouraging investment.

- Taking appropriate decisions related to private or public institutions to improve Investors' confidence in Jordan's investment environment.

### The investment environment in Ma'an:

As per in the Investment Law No. 30 of 2014 and the Income Tax Reduction Law in the Less Developed Areas (issued under Article (5) of the Investment Law No. (30) Of 2014), the following taxes and exemptions are imposed on investment projects:

**Table 3 payable income tax and tax exemptions**

| Development areas | Less developed areas                                                                                                                                                                                       |
|-------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Income tax is 5%  | Value of income tax 20% According to the divisions in the law, Ma'an governorate is classified as category B where investors get 80% tax exemption on income tax for 20 years from the date of investment. |

## 2. Market Analysis

### Project Description

The project aims to establish a herbs and medicinal plants factory in Ma'an Development Area, while encouraging farmers in Ma'an on the cultivation of herbs to purchase crops from them and from the rest of the governorates, wherebyThe shortage of herbs and medicinal plants will be imported from neighboring countries.

In addition to determining the types of rare plants that will be used in the area, where Ma'an has the advantage of having large quantities of the desired plants for aromatic and medicinal uses. The plant will extract the aromatic and medicinal oils from these plants then market them, after filling them in custom packages to fulfill Jordan's need of herbal extracts and the opportunity to export the products abroad due to the growing demand.

### Description of the Production Process

The idea of the project is to buy medicinal herbs from Ma'an and other provinces and importing others from neighboring countries.

The cost of raw materials (herbs and medicinal plants) that are purchased and imported needed for the production process equals around 60% of the value of the total revenue on the basis of cost of raw materials and the cost of importing them.

### Production Stages

- Gathering herbs and medicinal plants in bags and moving them to the warehouse
- Washing herbs using machines specific for washing herbs and plants
- Drying the herbs and adjusting the temperature to maintain volatile oils and biomaterials
- Grinding the herbs by using milling machines
- Extracting useful raw materials with therapeutic benefits from the herbs
- Packaging

### Project Objectives

The objectives of the project are as follows:

- Achieve profitable returns for those in charge of the project
- Hire people and reduce unemployment rates
- Provide targeted markets with their need of medicinal herbs
- Exploit the vast agricultural lands in the Governorate of Ma'an
- Contribute in the development of the agricultural and industrial sector and provide jobs

### Proposed Product

The project will fill medicinal herbs (chamomile, fennel, thyme, sage, anise, ginger) in cloth bags (tea bags), then package them in carton packaging. Based on information available from the manufacturers of tea bags, it was assumed that the weight per bag is (8.1 to 5.2) grams and each package consists of (100-110) bags.

### Project Justifications

Global markets experiencing significant growth in demand for medicinal herbs consumption, noting that medicinal herbs of various kinds are available in Jordan and therefore, most of the proposed project revenues will be local, in addition to the opportunity for export.

### Target segments

- Local market
- International market

### Market Size Analysis

Market size analysis was conducted according to exports and imports in Jordan market as shown in Table (4)

Table 3 Summary of Annual Needs of Required Herbs

## • 1.1 Competitors Analysis

The number of competitors in the domestic market of herbal tea factories are 10 factories.

### Examples of direct competitors:

- Nutri Dar PLC.
- Narain Food Industries / Mega Food Industries.
- Salsabil specialized industries.
- Jordan's lush natural cosmetics.
- Shams Al Marefa of the trade and industry of dietary supplements.
- Al Arrab of natural cosmetics.

### Production Capacity

Production quantity of natural herbal plants has been calculated by assuming working 330 work days per year and 9 hours of work per day. The production capacity estimated by 800 packets \ hour as follows:

Production capacity =  $800 \times 9 \times 330 = 2,376,000$  packets \ years.

**Table 4 Production capacity**

| Analysis of Production Capacity                                    |         |
|--------------------------------------------------------------------|---------|
| Production capacity of the project (packets)                       | 2376000 |
| The proportion of Chamomile production from the overall production | 15.000% |
| The proportion of fennel production from the overall production    | 15.000% |
| The proportion of thyme production from the overall production     | 25.000% |
| The proportion of Sagebrush production from the overall production | 15.000% |
| The proportion of of anise production from the overall production  | 15.000% |
| The proportion of ginger production from the overall production    | 15.000% |

### Price Analysis and Pricing Policy

**Table 5 Prices of the Required Raw Materials for Manufacturing**

| Required raw materials | Quantity | Cost (JD) |
|------------------------|----------|-----------|
| chamomile              | 1 ton    | 5000      |
| Fennel                 | 1 ton    | 2000      |

| Required raw materials | Quantity | Cost (JD) |
|------------------------|----------|-----------|
| Thyme                  | 1 ton    | 1500      |
| Sage                   | 1 ton    | 4000      |
| Anise                  | 1 ton    | 3000      |
| Ginger                 | 1 ton    | 6000      |
| Preservatives          | 1 ton    | 1773      |

Table 6 the proposed selling prices per packets (200 gm)

| Prices          | JD   |
|-----------------|------|
| Chamomile       | 2    |
| Fennel          | 0.85 |
| Breckland Thyme | 1.1  |
| Sage            | 2.5  |
| Anise           | 1.2  |
| Ginger          | 2.5  |

## Projected Revenues

## 3. Technical Analysis

### Required Human Resources

**Table 8 the required labor for the project**

| Job title                               | No.       |
|-----------------------------------------|-----------|
| <b>Indirect staff</b>                   |           |
| General Manager                         | 1         |
| Financial Manager                       | 1         |
| Production Manager                      | 1         |
| Accountants                             | 2         |
| Director of Human Resources             | 1         |
| Marketing Representative                | 3         |
| Warehouse security guard                | 1         |
| Secretary                               | 1         |
| Driver                                  | 2         |
| Guard                                   | 1         |
| <b>Total Non-Direct staff</b>           | <b>14</b> |
| Chemical engineer                       | 2         |
| Pharmacist assistant and lab technician | 1         |
| Technicians Workers                     | 8         |
| <b>Total Direct staff</b>               | <b>11</b> |
| <b>total summation</b>                  | <b>25</b> |

- **General Manager:** will perform all the tasks and responsibilities of the general manager, and have active participation in the identification and formulation of objectives, as well as planning and organizing workflow of the facility to ensure the achievement of objectives, and alignment with professional safety and security regulations.

- **Financial Manager:** will be responsible for the implementation of the plans, regulations, administrative, accounting and financial procedures, as well as monitoring and controlling the resources and expenditures of the department, and the organization of the budget and activities in the department. Also, prepare financial reports.

- **Production Manager:** will be responsible for the technical and production matters and oversee the production process.
- **Human Resources Director:** will be responsible for planning, recruitment of human resources for the company and work to measure their performance and develop their abilities through effective training programs and work to stimulate employees to be creativity and innovative in the areas of their business and work to regulate the accumulation of experience and knowledge in the areas of work.
- **Laboratory technician:** will be responsible for the organization of work within the laboratories and ensure the required quality.
- **Marketing officer:** will study the market needs, and follow-up with advertising and media outlets and assess the effectiveness of activities, along with monitoring the level of sales.
- **Accountant:** will be responsible for the implementation of financial and accounting procedures in the plant.
- **Packaging technician:** will be responsible for packaging and arranging products in sterilized packages and prepare them for sale.
- **Guard:** will maintain the security of the plant.
- **Maintenance Technician:** will be responsible all the electrical and mechanical maintenance, and follow up on the implementation of plans and programs in order to ensure the continuity of the production process and quality at full capacity with the lowest possible cost, and make sure of the availability of spare parts, and the preparation of technical reports.
- **Secretary:** will respond to calls and arrange meetings for managers.
- **Public Safety staff:** will study potential risks in the factory and work to provide a safe working environment.
- **Development Department staff:** will develop the efficiency and product quality and reduce costs of production.
- **Quality department staff:** will perform quality control over the product by reducing defects, and improve production.
- **Hygiene staff:** will maintain the cleanliness of the plant and offices.
- **Driver:** will deliver products to customers.

### Site Analysis

The idea of the project aims to exploit the land in Ma'an and encourage farmers to grow herbs and medicinal plants; since Maan area is suitable for agriculture by using modern agricultural methods, as well as creating jobs and improving the economic situation. Add to that the price of land in Ma'an Development Area is low compared to the price of industrial land prices in other regions of the Kingdom, In addition to the features and exemptions obtained by the region. The MDA is distinguished by the following:

- Located near Saudi Arabia and on the main road that connects the south of Jordan and Iraq, allowing investors to benefit from a bigger market
- Constitutes a major component of a transport and storage system for exports and imports of the Hashemite Kingdom of Jordan through its proximity to the port of Aqaba at a distance of 110 km and its proximity to the land allocated for the land port and the existing railway

## Technical Requirements Analysis

### 1.1.1 Land and Construction

The laws and regulations of Ma'an Development Area states that the lowest space for the plant must be 4 Donms, including 2 Donms for construction work. The project will be constructed on an area of 4000 sq.m.

The following table shows the needed land:

**Table9 Required Land for the Project**

| Land                     | Cost (JD/sq.m) | Area sq.m   |
|--------------------------|----------------|-------------|
| <b>The required land</b> | <b>13</b>      | <b>4000</b> |

Source: Land registration – Ma'an

The following table shows the required construction work for the project:

**Table 10 Required Construction Work**

| Construction work | Area (m <sup>2</sup> ) |
|-------------------|------------------------|
| Buildings         | 2,000                  |
| Asphalt works     | 500                    |

### Machinery and Equipment

The following table shows the required machinery and equipment needed for the project:

**Table 11 Machinery and equipments**

| Machinery and equipment     | Quantity | Cost (JD per unit) |
|-----------------------------|----------|--------------------|
| Washing quipment            | 2        | 8,000              |
| Driers                      | 2        | 6,000              |
| Milling equipment           | 2        | 16,000             |
| Juices extracting equipment | 2        | 50,000             |
| Packaging line              | 1        | 60,000             |
| Mixing and blending machine | 1        | 40,000             |
| Laboratory Equipments       | 1        | 25,000             |
| Forklift                    | 2        | 12,000             |

## Vehicles and Transportation

The following table shows a list of vehicles and meanss of transportation required for the project

**Table 12 Vehicles and modes of transportation**

| Vehicles and modes of transportation | Quantity | Unit cost (JD) |
|--------------------------------------|----------|----------------|
| Pickup truck                         | 2        | 23,400         |

## 4. Financial Analysis

The Financial Part illustrates all the assumptions which were used when we have developed the study including project expenses related to capital expenditures, operating expenses ( Fixed and Variable costs) followed by illustrating project revenues.

### Assumptions

#### Calculation Assumptions:

- The weighted average cost of capital used in the study is 12.05% as it was calculated considering risk free and debt Interest rates as well as Market risk premiums to consider alternative opportunity costs for investor.
- Income tax on the net project income is 5 % during the life time of the project.
- Project working capital has been estimated and added to project cash outflows at the beginning of the project and annual increase in working capital has been also estimated and added to the operating expenses then net working capital has been added to total cash inflows at the end of project lifetime.

The time span for the financial study is 10 years starting from 2018, where annual increase rates have been estimated as per the tables below:

## Assumptions

**Table 13 General Assumptions**

| General Information                   |               |
|---------------------------------------|---------------|
| All Financial Numbers (Currency)      | Jordan Dinars |
| Financial Study Time Span (Years)     | 10            |
| Expected Project First Operating Year | 2018          |
| Last Year in the Financial Study      | 2027          |

**Table 14 Currency Exchange Rates**

| Exchange Rates  | Jordan Dinars |
|-----------------|---------------|
| American Dollar | 0.708         |
| Euro            | 0.760         |

**Table 15 Annual Growth Rates Assumptions**

| Annual Growth Rates                        | Average |
|--------------------------------------------|---------|
| Annual Population Growth Rate              | 2.20%   |
| Annual Sales Price Increase Rate           | 1.00%   |
| Annual Expenses Increase Rate              | 2.00%   |
| Annual Increase Rate in Employees Salaries | 4.1%    |

## Capital Expenditures

The estimated cost of the project is 1,598,302 JD and it covers land costs, construction works, machinery and equipment, furniture, pre-operating expenses and working capital. The following tables summarize the details of these expenses:

**Table 19 Land Capital Expenditure**

| Land          | (Jordan Dinar/Meters Square) | Cost | Area (M2) | Cost          |
|---------------|------------------------------|------|-----------|---------------|
| Required Land | 13                           |      | 4,000     | 52,000        |
| Cost          |                              |      |           | <b>52,000</b> |

**Table 20 Construction Work Capital Expenditure**

| Description  | Cost (JOD per Squared Meters) | Area (Squared Meters) | Gross Cost Jordan / |
|--------------|-------------------------------|-----------------------|---------------------|
| Buildings    | 250                           | 2,000                 | 500,000             |
| Paving       | 12                            | 500                   | 6,000               |
| Other        | 0                             | -                     | 25,000              |
| <b>Total</b> |                               |                       | <b>531,000</b>      |

**Table 21 Machinery and Equipment Capital Expenditure**

| Machinery and equipment     | Quantity | Cost / JD | Total Cost     |
|-----------------------------|----------|-----------|----------------|
| Washing quipment            | 2        | 8,000     | 16,000         |
| Driers                      | 2        | 6,000     | 12,000         |

### Sources of Funding

The financing structure of the project consists of loans and Equity. The investment cost of this project is estimated at (1,598,203) JD, where 60% of the project will be financed through loans (958,922) JD, and the remaining (40%) through (Equity) with (639,281) JD. The following table summarizes the general structure of the required financing:

**Table 27 Sources of Funding**

| Funding Sources         | Amount           | Percentage     |
|-------------------------|------------------|----------------|
| Equity (Self Financing) | 639,281          | %40            |
| Loans                   | 958,922          | %60            |
| Total                   | <b>1,598,203</b> | <b>%100</b>    |

#### Human Resources

The total annual salaries and monthly wages has been estimated on 16 months for the purpose of considering annual increments on salaries as well as payments related to social security and health insurance,... etc.

The following table summarizes the expected annual salaries and wages, considering annual increment on salaries as per the income statement:

Table 31 Expected staff preparation

| Job Title                               | No.       | Monthly salaries | Total monthly salaries | Total yearly salaries |

Loan

The table below summarizes all details related to the loan such as annual installments and payment methods for the remaining amount of the loan for each year of the project.

**Table 35 Loan Details**

|                             |         |
|-----------------------------|---------|
| <b>Loan Value</b>           | 958,922 |
| <b>Annual Interest Rate</b> | 9.48%   |
| <b>Loans Period</b>         | 5       |
| <b>Loan Starts at year:</b> | 2018    |
| <b>Annual Payment</b>       | 249,610 |
| <b>Number of Payments</b>   | 5       |

| Year | Annual Payment | Interest | Capital | Loan Remaining Value |
|------|----------------|----------|---------|----------------------|
| 2018 |                |          |         | 958,922              |
| 2019 | 249,610        | 90,906   | 158,704 | 800,218              |
| 2020 | 249,610        | 75,861   | 173,749 | 626,469              |
| 2021 | 249,610        | 59,389   | 190,220 | 436,249              |
| 2022 | 249,610        | 41,356   | 208,253 | 227,996              |
| 2023 | 249,610        | 21,614   | 227,996 | 0                    |

## Income Statement

### Expected Balance Sheet

The balance sheet is one of the main statements which the project depends on, as it reflects the financial position of the entity and is usually estimated on the last day of the financial year.

All financial information and analysis of the project shall be the estimated for the years (2018-2027) as shown in the table below:

**Table 38 Expected Balance Sheet**

### Feasibility Indicators

There are more than one method to calculate the discounted cash flow statement. However, in this study, WACC was used to calculate the discounted cash flows and net investment value. The Company's financing structure is based on equity and loans, therefore the discounted rate should be adjusted according to WACC based on the following assumptions, the following table illustrates the net expected free cash flow of the project:

Table 39 Free Net Cash flows Table

| Net Cashflows                     | Before Operating  | 2018          | 2019           | 2020           | 2021           | 2022           | 2023           | 2024           | 2025           | 2026           | 2027           | Final Value      |
|-----------------------------------|-------------------|---------------|----------------|----------------|----------------|----------------|----------------|----------------|----------------|----------------|----------------|------------------|
| <b>Net Free Cashflows</b>         | <b>-1,598,203</b> | 136,044       | 342,543        | 425,820        | 475,375        | 461,914        | 479,737        | 487,060        | 473,026        | 458,429        | 475,123        | 6,137,011        |

Table below (40) illustrates payback period for the project, as it is one of the indicators which investors care about before taking the investment decision as they need to know when the project will return the invested amount of money. Payback period definition is the total required period so that the project generates a total money equal to the total invested capital expenditure, as investor is always looking to return the full invested amount of money at the earliest possible.

Table 40 payback period

| Payback Period                | Before Operating  | 2018      | 2019      | 2020    | 2021    | 2022           | 2023            | 2024             | 2025              | 2026            | 2027              |

Table 41 Financial Analysis Results

|                                         |           |
|-----------------------------------------|-----------|
| Weighted Average Cost of Capital (WACC) | %12.05    |
| Net Present Value for Cashflows         | 1,743,799 |

|                         |        |
|-------------------------|--------|
| Payback Period          | 4      |
| Internal Rate of Return | %27.85 |

### Sensitivity Analysis

Sensitivity analysis is conducted to investigate the effects of changes in significant inputs of the financial analysis. This includes changes in revenues, total investment costs, and operating costs.

### Conclusions and Recommendations

Based on the profitability analysis and considering that project internal rate of return is higher than WACC, it is concluded that the project is feasible as the net present value for the project is positive 1,742,799 Jordan Dinars considering that the project provides 25 Job Opportunities for the governorate residents.
